

ISO 15171-2:2016-02 (E)

Connections for fluid power and general use - Hydraulic couplings for diagnostic purposes - Part 2: Coupling with M16 x 2 end for connection under pressure

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Performance requirements	2
4.1	General	2
4.2	Working pressure and temperature	2
4.3	Flow rate and pressure drop	2
4.4	Connection of the coupling with a coupling counterpart	2
4.5	Burst and cyclic endurance (impulse) test pressures	3
4.6	Test requirements	3
5	Design	3
5.1	Basic dimensions	3
5.2	Diagnostic coupling with a stud end ISO 6149-2, M14 × 1,5	5
5.3	Diagnostic coupling with a stud end ISO 9974-2, M14 × 1,5	5
5.4	Diagnostic coupling with a stud end ISO 1179-2, G1/4	5
5.5	Diagnostic coupling with a stud end ISO 11926-2, 7/16-20 UNF	6
6	Manufacture	6
6.1	Construction	6
6.2	Workmanship	6
6.3	Finish	7
7	Designation of couplings	7
8	Marking	7
Annex A (informative) Other hydraulic connection types suitable for diagnostic couplings		8
