Fluid power - Specification of reference dictionary - Part 1: General overview on organization and structure

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principles of specification	1
4.1	Set of attributes for description of a property	1
4.2	Set of attributes for description of a class	2
4.3	Basic structure of reference dictionary	3
4.3.1	General	3
4.3.2	Basic structure of the hierarchic order of the definition classes	3
4.3.3	Allocation of properties for basic quantities within the hierarchic order of definition classes	3
4.3.4	Basic structure of the hierarchic order of the application classes	4
5	Basic structure of the reference dictionary for fluid power	4
5.1	General	4
5.2	Definition classes	5
5.3	Properties	5
5.4	Application classes	5
Annex A (informative) Basic definitions and underlying principles from ISO Guide 77-2		7
Annex B (informative) Example for the classification of a cylinder to show the relation between application classes and definition classes		10
