## Earth-moving machinery - Electrical safety of machines utilizing electric drives and related components and systems - Part 1: General requirements

---

<b>Contents</b>		<b>Page</b>
Foreword .....		vii
Introduction .....		viii
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Normative references .....</b>	<b>2</b>
<b>3</b>	<b>Terms, definitions and abbreviated terms .....</b>	<b>3</b>
3.1	Electric shock protection-related terms and definitions .....	3
3.2	Control-related terms and definitions .....	5
3.3	Electrical infrastructure-related terms and definitions .....	6
3.4	Risk-related terms and definitions .....	7
3.5	Miscellaneous terms and definitions .....	8
3.6	Abbreviated terms .....	9
<b>4</b>	<b>General requirements .....</b>	<b>9</b>
4.1	General .....	9
4.2	Provisions for handling .....	9
4.3	Provisions for transportation and storage .....	10
4.4	Components and devices .....	10
4.5	Intended operating environment .....	10
4.5.1	General .....	10
4.5.2	Exposure .....	10
4.5.3	Altitude .....	11
4.5.4	Ingress protection .....	11
4.6	Electrical source .....	11
<b>5</b>	<b>Protection against electric shock hazards .....</b>	<b>11</b>
5.1	General .....	11
5.2	Protection by enclosures .....	11
5.3	Protection by insulation .....	12
5.4	Protection against residual voltages .....	13
5.5	Protection by barriers .....	13
5.6	Protection by inaccessibility .....	13
5.7	Special considerations for low voltage energy storage devices and related buses .....	13
5.8	Prevention of touch voltage .....	14
5.8.1	General .....	14
5.8.2	Protection by class II construction or equivalent .....	14
5.8.3	Protection by electrical separation .....	14
5.9	Protection by automatic disconnection of source .....	15
5.10	Protection by equipotential bonding .....	15
5.10.1	General .....	15
5.10.2	Protective equipotential bonding circuit .....	16
5.10.3	Functional equipotential bonding .....	18
5.10.4	Devices for earthing and short-circuiting live parts .....	19
5.11	Protection by use of PELV .....	19
5.11.1	General .....	19
5.11.2	Sources for PELV .....	19
<b>6</b>	<b>Protection against electrical fire hazards .....</b>	<b>20</b>

6.1	General .....	20
6.2	Fire hazard assessment .....	20
6.3	Prevention of ignition .....	20
6.4	Minimizing the spread of fire .....	20
7	Protection against thermal hazards .....	20
8	Protection against mechanical hazards .....	20
9	Protection against abnormal operation hazards .....	20
9.1	General .....	20
9.2	Overcurrent protection (OCP) .....	21
9.2.1	General .....	21
9.2.2	Transformers .....	21
9.2.3	Overcurrent protection (OCP) implementation .....	21
9.2.4	Rating and setting of overcurrent protective systems .....	21
9.2.5	Placement of overcurrent protective devices .....	21
9.3	Abnormal temperature protection .....	22
9.4	Earth (or chassis in the case of self-powered machines) fault/residual current protection .....	22
9.5	Protection against overvoltages due to lightning and to switching surges .....	22
9.6	Protection against other abnormal operation hazards .....	22
10	Electric power source .....	22
10.1	Disconnection of source .....	22
10.1.1	General .....	22
10.1.2	Source disconnecting devices .....	23
10.1.3	Equipment disconnecting devices .....	24
10.2	Prevention of unintended start-up .....	24
10.3	External electrical charging .....	24
11	Wiring .....	24
11.1	General .....	24
11.2	Conductors .....	25
11.3	Insulation .....	25
11.4	Conductor and cable ampacity .....	25
11.5	Flexible cables .....	26
11.5.1	General .....	26
11.5.2	Mechanical rating .....	26
11.5.3	Ampacity of cables wound on reels .....	26
11.6	Assemblies having sliding contacts .....	26
11.6.1	Accessibility of live parts .....	26
11.6.2	Protective conductor circuit .....	27
11.6.3	Protective conductor current collectors .....	27
11.6.4	Removable current collectors used for disconnection .....	27
11.6.5	Clearances .....	27
11.6.6	Creepage distances .....	27
11.6.7	Conductor system sectioning .....	28
11.6.8	Construction and installation .....	28
11.7	Connections and routing .....	28
11.7.1	General .....	28
11.7.2	Conductor and cable runs .....	28
11.7.3	Conductors of different circuits .....	29
11.8	Identification of conductors .....	29
11.8.1	General .....	29
11.8.2	Protective conductor identification .....	29
11.8.3	Neutral conductor identification .....	29
11.8.4	Identification by colour .....	30
11.9	Wiring inside enclosures .....	31
11.10	Wiring outside enclosures .....	31
11.10.1	General .....	31
11.10.2	External ducts .....	31

11.10.3	Connection to moving elements of the EMM .....	31
11.10.4	Interconnection of devices on the EMM .....	32
11.10.5	Plug/socket combinations .....	33
11.10.6	Dismantling for shipment .....	34
11.10.7	Spare conductors .....	34
11.11	Ducts and boxes .....	34
11.11.1	General .....	34
11.11.2	Rigid metal conduit and fittings .....	35
11.11.3	Flexible metal conduit and fittings .....	35
11.11.4	Flexible nonmetallic conduit and fittings .....	35
11.11.5	Cable trunking systems .....	35
11.11.6	EMM compartments and cable trunking systems .....	35
11.11.7	Boxes .....	35
11.11.8	Motor wiring boxes .....	35
12	Electric motors and generators .....	36
12.1	General .....	36
12.2	Enclosures .....	36
12.3	Dimensions .....	36
12.4	Mounting and compartments .....	36
12.5	Criteria for motor selection or design .....	36
12.6	Overheating protection .....	37
12.7	Overspeed protection .....	37
13	Non-motor loads .....	37
13.1	Accessories .....	37
13.2	Local lighting .....	38
13.2.1	General .....	38
13.2.2	Source .....	38
13.2.3	Protection .....	38
13.2.4	Fittings .....	38
14	Controls .....	39
14.1	Control circuits .....	39
14.1.1	Control circuit voltages .....	39
14.1.2	Protection .....	39
14.2	Control functions .....	39
14.3	Protective interlocks .....	39
14.3.1	Reclosing or resetting of an interlocking safeguard .....	39
14.3.2	Operating limits, auxiliary functions, interlocks, and reverse current braking .....	39
14.4	Control functions in the event of failure .....	39
14.4.1	General .....	40
14.4.2	Measures to minimize risk in the event of failure .....	40
14.4.3	Protection against malfunction due to earth (or chassis in the case of self-powered machines) faults, voltage interruptions and loss of continuity .....	41
14.5	Operator interface and machine-mounted control devices .....	42
14.5.1	General .....	42
14.5.2	Push-buttons .....	42
14.5.3	Indicator lights and displays .....	43
14.5.4	Illuminated push-buttons .....	43
14.5.5	Rotary control devices .....	43
14.5.6	Start devices .....	43
14.5.7	Emergency stop devices .....	43
14.5.8	Emergency switching off devices .....	43
14.5.9	Enabling control devices .....	43
14.6	Controlgear: location, mounting, and enclosures .....	43
14.6.1	General .....	43
14.6.2	Location and mounting .....	43
14.6.3	Degrees of protection .....	44
14.6.4	Enclosures, doors, and openings .....	45
14.6.5	Access to controlgear .....	46
14.7	Access to low and high-voltage equipment .....	46

<b>15</b>	<b>Manuals and technical documentation .....</b>	<b>46</b>
<b>15.1</b>	<b>General .....</b>	<b>46</b>
<b>15.2</b>	<b>Information to be provided .....</b>	<b>46</b>
<b>15.3</b>	<b>Documentation .....</b>	<b>46</b>
<b>15.4</b>	<b>Overview diagrams and function diagrams .....</b>	<b>47</b>
<b>15.5</b>	<b>Circuit diagrams .....</b>	<b>47</b>
<b>15.6</b>	<b>Operator's manual .....</b>	<b>47</b>
<b>15.7</b>	<b>Maintenance manual and service literature .....</b>	<b>47</b>
<b>15.7.1</b>	<b>General .....</b>	<b>47</b>
<b>15.7.2</b>	<b>Reduction of electrical hazards while servicing .....</b>	<b>48</b>
<b>15.8</b>	<b>Parts list .....</b>	<b>48</b>
<b>16</b>	<b>Marking .....</b>	<b>49</b>
<b>16.1</b>	<b>General .....</b>	<b>49</b>
<b>16.2</b>	<b>Warning signs .....</b>	<b>49</b>
<b>16.2.1</b>	<b>Electric shock hazard .....</b>	<b>49</b>
<b>16.2.2</b>	<b>Hot surfaces hazard .....</b>	<b>49</b>
<b>16.2.3</b>	<b>Magnetic field hazard .....</b>	<b>49</b>
<b>16.2.4</b>	<b>Arc flash hazard .....</b>	<b>49</b>
<b>16.2.5</b>	<b>Residual voltage hazard .....</b>	<b>50</b>
<b>16.3</b>	<b>Functional identification .....</b>	<b>50</b>
<b>16.4</b>	<b>Marking of equipment .....</b>	<b>50</b>
<b>16.4.1</b>	<b>General .....</b>	<b>50</b>
<b>16.4.2</b>	<b>Indication of hazardous voltages (all machines) .....</b>	<b>50</b>
<b>16.5</b>	<b>Reference designations .....</b>	<b>50</b>
<b>16.6</b>	<b>Protective equipotential bonding terminals .....</b>	<b>50</b>
<b>17</b>	<b>Tests .....</b>	<b>50</b>
<b>17.1</b>	<b>General .....</b>	<b>50</b>
<b>17.2</b>	<b>Protective equipotential bonding circuit continuity .....</b>	<b>51</b>
<b>17.3</b>	<b>Conditions for protection by automatic disconnection of source .....</b>	<b>51</b>
<b>17.3.1</b>	<b>General .....</b>	<b>51</b>
<b>17.3.2</b>	<b>Fault loop impedance verification and suitability of the associated overcurrent protective device in TN systems .....</b>	<b>52</b>
<b>17.4</b>	<b>Insulation resistance tests .....</b>	<b>52</b>
<b>17.4.1</b>	<b>Low-voltage insulation resistance test .....</b>	<b>52</b>
<b>17.4.2</b>	<b>High-voltage insulation resistance test .....</b>	<b>52</b>
<b>17.5</b>	<b>Voltage withstand tests .....</b>	<b>52</b>
<b>17.6</b>	<b>Protection against residual voltages .....</b>	<b>53</b>
<b>17.7</b>	<b>Functional tests .....</b>	<b>53</b>
<b>17.8</b>	<b>Retesting .....</b>	<b>53</b>
<b>17.9</b>	<b>IP test for high-voltage equipment .....</b>	<b>53</b>
	<b>Annex A (informative) List of significant hazards .....</b>	<b>54</b>
	<b>Annex B (normative) TN systems -- Protection against indirect contact .....</b>	<b>56</b>
	<b>Annex C (informative) Explanation of emergency operation functions .....</b>	<b>59</b>
	<b>Bibliography .....</b>	<b>65</b>
