ISO 16890-3:2016-12 (E)

Air filters for general ventilation - Part 3: Determination of the gravimetric ef ficiency and the air flow resistance versus the mass of test dust captured

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1
3.1 Air flow and resistance 2
3.2 Test device 2
3.3 Gravimetric efficiency 3
3.4 Other terms 4

4 Symbols and abbreviated terms 4

5 General test device requirements 5
5.1 Test device requirements 5
5.2 Test device preparation 5

6 Loading dust 6

7 Test equipment 6

8 Qualification of test rig and apparatus 9
8.1 Schedule of qualification testing requirements 9
8.2 Dust feeder air flow rate 9
8.3 Final filter efficiency qualification test 10

9 Test sequence dust-loading procedure 10
9.1 Test procedure for the filter 10
9.1.1 Preparation of the test device 10
9.1.2 Initial resistance to air flow 10
9.2 Dust loading 10
9.2.1 Dust loading procedure 10
9.2.2 Arrestance 11
9.2.3 Test dust capacity 12

10 Reporting results 12
10.1 General 12
10.2 Required reporting elements 12
10.2.1 Report values 12
10.2.2 Report summary 12
10.2.3 Report details 14

Annex A (informative) Resistance to air flow calculation 19
