DIN EN ISO 14414:2019-09 (E)

Pump system energy assessment (ISO/ASME 14414:2019)

Contents

Page

European foreword ... 5

Foreword ... 6

Introduction ... 8

1 Scope ... 9

2 Normative references ... 9

3 Terms and definitions ... 10

4 Identification of the assessment team, authority and functions ... 10
4.1 Identification of assessment team functions ... 10
4.2 Assessment team structure, leadership and competency ... 11
4.3 Facility management support ... 11
4.4 Communications ... 11
4.5 Access to facilities, personnel and information ... 12
4.6 Assessment objectives, scope and boundaries ... 12
4.7 Action plan ... 12
4.7.1 General ... 12
4.7.2 Assessment scheduling ... 13
4.8 Initial data collection and evaluation ... 13
4.8.1 General ... 13
4.8.2 Initial facility specialist interviews ... 13
4.8.3 Energy project history ... 14
4.8.4 Energy cost ... 14
4.8.5 Initial system data ... 14
4.9 Objective check ... 14

5 Conducting the assessment ... 14
5.1 Assessment levels ... 14
5.1.1 General ... 14
5.1.2 Level 1 assessments ... 15
5.1.3 Level 2 assessments ... 16
5.1.4 Level 3 assessments ... 16
5.2 Walk through ... 17
5.3 Understanding system functional requirements ... 18
5.4 Determining system boundaries and system energy demand ... 18
5.5 Information needed to assess the efficiency of a pumping system ... 18
5.5.1 General ... 18
5.5.2 Electrical motor/drive information ... 18
5.5.3 Pump information ... 19
5.5.4 Liquid properties information ... 20
5.5.5 Detailed system data ... 20
5.5.6 Measured data ... 21
5.6 Data collection ... 22
5.6.1 System information ... 22
5.6.2 Measurement of pump and motor operating data ... 22
5.6.3 Pressure ... 22

5.6.4 Flow 22
5.6.5 Input power 23
5.7 Cross validation 23
5.8 Wrap-up meeting and presentation of initial findings and recommendations 23

6 Reporting and documentation 24
6.1 Final assessment report 24
6.2 Data for third party review 24
6.3 Review of final report by assessment team members 24

Annex A (normative) Report contents 25
A.1 Executive summary 25
A.2 Introduction and facility information 25
A.3 Assessment objectives and scope 25
A.4 Description of system(s) studied in assessment and significant system issues 25
A.5 Assessment data collection and measurements 26
A.6 Data analysis 26
A.7 Annual energy consumption baseline 26
A.8 Performance improvement opportunities identification and prioritization 26
A.9 Recommendations for implementation activities 27
A.10 Appendices 28

Annex B (informative) Recommendations on efficient system operation and energy reduction — Examples 29
B.1 General recommendations for efficient system operation 29
B.2 System management to ensure economic operation 31
B.2.1 General 31
B.2.2 System management recommendations 32
B.2.3 System updating and improvement 32
B.2.4 Pump system piping 32
B.3 Common causes and remedies for excessive energy consumption for rotodynamic pump 32
B.3.1 General 32
B.3.2 Reduce system head losses 33
B.3.3 Reduction of system flowrate 33
B.3.4 Ensuring that components operate close to best efficiency 33
B.3.5 Change pumping system run time 34
B.4 Examples of basic energy reduction opportunity calculations for rotodynamic pumps 34
B.4.1 Calculation of existing and post assessment energy consumption 34
B.4.2 Example 35
B.4.3 Secondary systems: Sealing systems 39
B.5 Explanation of basic energy reduction opportunity calculations for positive displacement pumps 42
B.5.1 General 42
B.5.2 Example 44

Annex C (informative) Expertise, experience and competencies 47
C.1 Systems 47
C.2 Pumps 47
C.3 Motors and drives 48
C.4 Analysis and reporting 48

Annex D (informative) Recommended guidelines for analysis software 50

Annex E (informative) Example of pre-screening worksheet 52

Annex F (informative) Specific energy consumption **54**
F.1 General **54**
F.2 Specific energy consumption in different type of pump systems **54**
Annex G (informative) Pumping system parasitic power **58**
G.1 General **58**
G.2 Parasitic power equations **58**
G.3 Conclusions **59**
G.4 Relationship between parasitic power and vibration level **59**
G.5 Correlation between parasitic power level in a pumping system and MTBF **60**
Annex H (informative) Example of pumping system efficiency indicator **61**
H.1 General **61**
H.2 PSEI calculation **62**
H.3 Interpretation of results **63**
Bibliography **64**
