ISO 16300-1:2018 (E)

Automation systems and integration — Interoperability of capability units for manufacturing application solutions — Part 1: Interoperability criteria of capability units per application requirements

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Interoperability and integration views for automation applications

- 4.1 Interoperability concepts for an automation system
- 4.2 Integration concepts for a manufacturing application of an automation system
- 4.3 Capability element

5 Relationship and structure of ISO 16300 series

6 Interoperability criteria of a manufacturing application

Annex A (informative) Object-Process Methodology overview

Annex B (informative) Reference models for application domains

- B.1 General
- B.2 Related interoperability concepts representation
- B.3 Model of enterprise as activity domains
