

ISO 2942:2018 (E)

Hydraulic fluid power — Filter elements — Verification of fabrication integrity and determination of the first bubble point

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Apparatus and materials
5	Test methods
5.1	General procedure
5.2	Verification of fabrication integrity (absence of air bubbles)
5.3	Determination of the first bubble point
6	Data presentation
7	Identification statement (Reference to this document)
Annex A	(informative) Test report for verification of filter element fabrication integrity and determination of the first bubble point
Annex B	(Informative) Theoretical basis for converting bubble point data obtained using different liquids
