

ISO 20140-1:2019 (E)

Automation systems and integration — Evaluating energy efficiency and other factors of manufacturing systems that influence the environment — Part 1: Overview and general principles

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Environmental performance evaluation of manufacturing systems
4.1	Manufacturing system life cycle phases and product life cycle phases
4.2	Manufacturing system life cycle steps and their environmental influence
5	Requirements for environmental performance evaluation
Annex A (informative) Use cases of ISO 20140	
A.1	General
A.2	Scenario 1: Purpose of and situations for environmental performance evaluation
A.2.1	Environmental performance evaluation of manufacturing system
A.2.1.1	Evaluation of a generic manufacturing process
A.2.1.2	Evaluation of a specific manufacturing process
A.2.2	Environmental performance evaluation of the product manufacturing phase
A.2.2.1	General
A.2.2.2	Evaluation based on general environmental performance data
A.2.2.3	Evaluation based on specific environmental performance data
A.3	Scenario 2: Activities through the manufacturing system life cycle
A.3.1	General
A.3.2	Evaluation of improvement of the environmental performance of the manufacturing system
A.3.3	Benchmarking of environmental performance
A.3.4	Alternative studies of environmental performance
A.3.5	Comparison of equipment supplier's Environmental Characteristics Data (ECD)
A.3.6	Setting the targets of environmental improvement
A.3.7	Monitoring and improvement of the shop floor operations
