

# ISO 28139:2019-12 (E)

## Equipment for crop protection - Knapsack combustion engine-driven airblast sprayers - Safety and environmental requirements and test methods

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | v           |
| Introduction ..... |  | vi          |
| 1                  | Scope .....  | 1           |
| 2                  | Normative references .....                                     | 1           |
| 3                  | Terms and definitions .....                                    | 2           |
| 4                  | Safety requirements and/or protective measures .....           | 3           |
| 4.1                | General .....  | 3           |
| 4.2                | Stability when in operation .....                              | 3           |
| 4.3                | Exhaust system .....   | 3           |
| 4.4                | Air tube and chemical hoses .....                              | 3           |
| 4.5                | Controls .....   | 4           |
| 4.5.1              | General .....  | 4           |
| 4.5.2              | Handle .....   | 4           |
| 4.5.3              | Throttle trigger .....   | 5           |
| 4.5.4              | Engine stopping device .....                                   | 5           |
| 4.5.5              | Starting device .....  | 5           |
| 4.5.6              | Liquid line shut-off valve .....                               | 5           |
| 4.6                | Machine support .....  | 5           |
| 4.6.1              | Harness .....  | 6           |
| 4.7                | Power-driven components .....                                  | 6           |
| 4.8                | Fuel tank .....  | 6           |
| 4.9                | Protection against contact with hot parts .....                | 6           |
| 4.10               | Electrical requirements .....                                  | 8           |
| 4.10.1             | General .....  | 8           |
| 4.10.2             | Ignition circuit .....   | 8           |
| 4.11               | Vibration .....  | 8           |
| 4.11.1             | Reduction by design at source and by protective measures ..... | 8           |
| 4.11.2             | Vibration measurement .....                                    | 8           |
| 4.12               | Noise .....  | 8           |
| 4.12.1             | Reduction by design at source and by protective measures ..... | 8           |
| 4.12.2             | Noise measurement .....  | 9           |
| 4.13               | Electromagnetic immunity .....                                 | 9           |
| 4.13.1             | Requirements .....   | 9           |
| 4.13.2             | Verification .....   | 9           |
| 5                  | Environmental requirements .....                               | 9           |
| 5.1                | General .....  | 9           |
| 5.2                | Absorbency of carrying straps .....                            | 9           |
| 5.3                | Spray tank .....   | 9           |
| 5.4                | Strainers and filters .....                                    | 10          |
| 5.5                | Droplet size .....   | 11          |
| 5.6                | Air hoses and chemical hoses .....                             | 11          |
| 5.7                | Fan .....  | 11          |
| 5.8                | Mass of total residual liquid .....                            | 11          |
| 5.9                | Stability .....  | 11          |
| 5.10               | Spray liquid flow rate .....                                   | 11          |

|       |  |    |
|-------|--|----|
| 5.11  | Test report .....  | 12 |
| 6     | Tests .....  | 12 |
| 6.1   | Test liquids and equipment .....   | 12 |
| 6.2   | Test conditions .....  | 13 |
| 6.2.1 | General .....  | 13 |
| 6.2.2 | Engine speed .....   | 13 |
| 6.3   | Spray liquid output .....  | 13 |
| 6.4   | Mass of total residual liquid .....  | 13 |
| 6.5   | Stability .....  | 14 |
| 6.6   | gauge scale and total tank volume .....  | 14 |
| 6.7   | Filling rate .....   | 14 |
| 6.8   | Air velocity .....   | 15 |
| 7     | Information for use .....  | 16 |
| 7.1   | Instruction handbook .....   | 16 |
| 7.1.1 | General .....  | 16 |
| 7.1.2 | Technical data .....   | 18 |
| 7.2   | Marking .....  | 19 |
| 7.3   | Warnings .....   | 19 |
|       | Annex A (informative) List of significant hazards .....  | 20 |
|       | Annex B (normative) Sampling grid position for air velocity determination .....                                | 25 |
|       | Annex C (normative) Stability test .....   | 26 |
|       | Annex D (informative) Example of a knapsack combustion engine-driven airblast sprayer .....                    | 27 |
|       | Annex E (informative) Safety signs .....   | 28 |
|       | Annex F (informative) Position of sprayer and Petri dishes for potential ground deposit<br>determination ..... | 29 |
|       | Annex G (informative) Sprayer locking device .....   | 30 |
|       | Annex H (informative) Device for detecting potential vertical deposits .....                                   | 31 |
|       | Annex I (informative) Potential ground deposit, potential vertical deposit and droplets size test .....        | 32 |
|       | Annex J (informative) Minimum content of test report .....   | 35 |
|       | Bibliography .....   | 39 |
