DIN EN 16524:2021-01 (E)

Mechanical products - Methodology for reduction of environmental impacts in product design and development

Contents

Page

European foreword 4

Introduction 5

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Symbols and abbreviations 10

5 Overview of the framework for the methodology (Preparatory step 0: strategic analysis) 10
5.1 General 10
5.2 Preparatory step 0: strategic analysis at company level 11
5.2.1 Objective 11
5.2.2 Procedure 12
5.2.3 Documentation of the preparatory step 0 12

6 Description of the methodology 12
6.1 General 12
6.2 Step 1: determination of the scoring of the environmental aspects of the reference product 14
6.2.1 Objective 14
6.2.2 Procedures 15
6.2.3 Documentation of Step 1 20
6.3 Step 2: selection/ranking of design options 20
6.3.1 Objective 20
6.3.2 Procedure 20
6.3.3 Documentation of Step 2 21
6.4 Step 3: Choice of suitable DO and EA indicators related to the reference product 21
6.4.1 Objective 21
6.4.2 Procedure 22
6.4.3 Documentation of Step 3 22
6.5 Step 4: evaluation of the redesign using DO and EA indicators 23
6.5.1 Objective 23
6.5.2 Procedure 23
6.5.3 Documentation of Step 4 23
6.6 Step 5: Final assessment and consideration for future activities 23
6.6.1 Objective 23
6.6.2 Procedure 24
6.6.3 Documentation of Step 5 24

7 Environmental claim 24

Annex A(normative) Environmental questionnaire 26

Annex B(normative) Analysis algorithm 35

Annex C(informative) Examples of design options for environmental improvement of the product, and associated DO indicators and EA indicators 40

Annex D(informative) Example of implementation of the methodology 48

D.1 General 48
D.2 Step 1 48
D.2.1 Description of the reference product and the project perimeter 48
D.2.2 Bill of Materials 48
D.2.3 Environmental questionnaire 51
D.2.4 Inputs to the algorithm 57
D.3 Steps 2 and 3 63

Annex E(informative) Background of the algorithm 67

E.1 Construction of the algorithm 67
E.1.1 Overview 67
E.1.2 Rules for environmental analysis 67
E.2 Consideration of legislation 75

Annex F(informative) Possible use of Life Cycle Assessment (LCA) for determining the score of each EA 76

Bibliography 85
