ISO 21360-1:2020 (E)

Vacuum technology — Standard methods for measuring vacuum-pump performance — Part 1: General description

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols and abbreviated terms

5 Test methods

5.1 Volume flow rate (pumping speed) measurement by the throughput method
5.1.1 General
5.1.2 Test dome for the throughput method
5.1.3 Experimental setup
5.1.4 Determination of the volume flow rate
5.1.5 Measuring procedure
5.1.6 Measuring uncertainties
5.1.7 Evaluation of the measurement
5.2 Volume flow rate (pumping speed) measurement by the orifice method
5.2.1 General
5.2.2 Test dome for the orifice method
5.2.3 Experimental setup
5.2.4 Determination of the volume flow rate
5.2.5 Measuring procedure for the orifice method
5.2.6 Adjustment of the pressure-measuring gauges
5.2.7 Measurement of the volume flow rate
5.2.8 Measuring uncertainties
5.2.9 Evaluation of the measurement
5.3 Volume flow rate (pumping speed) measurement by the pump-down method
5.3.1 General
5.3.2 Test dome for the pump-down method
5.3.3 Quick-acting valve
5.3.4 Experimental setup
5.3.5 Determination of the volume flow rate
5.3.6 Measuring procedure
5.3.7 Limits of applicability
5.3.8 Evaluation of the measurement
5.3.9 Measurement uncertainty
5.4 Measurement of the base pressure
5.4.1 Operating conditions
5.4.2 Test procedure for pumps with a base pressure >10−4 Pa
5.4.3 Test procedure for pumps with a base pressure <10−4 Pa
5.4.4 Evaluation of the measurement
5.5 Measurement of the compression ratio and the critical backing pressure
5.5.1 Experimental setup
5.5.2 Determination of the compression ratio and the critical backing pressure
5.5.3 Measurement procedure
5.5.4 Measurement uncertainty
5.5.5 Evaluation of the measurements
5.5.6 Specific recommendations for extremely high compression ratio measurements

Annex A (informative) Mean free path of some important gases

Annex B (informative) Measuring uncertainties

B.1 General remarks
B.2 Uncertainty of the volume flow rate measurement by the throughput method
B.3 Uncertainty of the volume flow rate measurement by the orifice method
B.4 Uncertainty of the volume flow rate measurement by the pump-down method
