3 Termsanddefinitions 10

4 Significanthazards 13

5 Equipment subject to requirements and interrelation between this document and ISO 12643-1:2023 13
5.1 General 13
5.2 Prepress equipment 13
5.3 Printing presses and coating/varnishing machines 14
5.4 Other equipment covered by this document 14

6 Safety requirements and/or protective measures 15
6.1 General 15
6.2 Guarding of significant hazards 15
6.2.1 General 15
6.2.2 Guard openings 15
6.2.3 Guarding in-running nips 15
6.3 Interlocks 18
6.3.1 Interlocking with guard locking 18
6.3.2 Continuous motion at crawl speed with an interlocking guard open 19
6.3.3 Closing an interlocking guard on dampening, flexo or inking devices 20
6.3.4 Closing an interlocking guard on inkjet printing devices 20
6.4 Hold-to-run controls 20
6.4.1 Specific requirements for sheet-fed presses 20
6.4.2 Specific requirements for forms printing presses and leporello printing presses 20
6.5 Automatic format-setting operations 21
6.6 Additional safeguarding methods for machine devices and components 21
6.6.1 Delivery units (pile lifting and lowering devices) 21
6.6.2 Transport carriages 30
6.6.3 Guarding plate-clamping devices 30
6.6.4 Continuous-flow drying devices on web presses 30
6.6.5 Folders for web presses 30
6.6.6 Safety distances for web feed on web-fed presses 32
6.6.7 Screen printing presses 32

7 Changing of printing plates 33
7.1 General 33
7.2 Automatic printing plate changes 33
7.3 Semi-automatic printing plate changes 34

8 Requirementsforprotectionagainstotherhazards 34
8.1 General 34
8.2 Fire and explosion protection 35
8.2.1 Protection against fire and explosion in continuous-flow drying devices 35

European foreword 5

Foreword 6

Introduction 8

1 Scope 9

8.2.2 Fire protection on web-fed rotary gravure presses and web-fed rotary flexo presses 37
8.3 Explosion protection exceptions 37
8.3.1 General 37
8.3.2 Exceptions for screen printing presses 38
8.3.3 Exceptions for automatic washing devices 38
8.4 Spillage from washing devices 38
8.5 Working platforms, access stairs, passageways and raised workplaces 38
8.5.1 General 38
8.5.2 Exception for sheet-fed presses 38
8.6 Electrostatic toner dust 39
8.7 Washing equipment for printing plates, rollers and doctor blades 39
8.7.1 Hazards due to emission of washing agents 39
8.7.2 Grounding of washing equipment 39
8.7.3 Unintended escape of solvents 39
8.8 Alcohol dosing devices 39
8.8.1 Concentration 39
8.8.2 Prevention of leakage and overflow 40
8.9 Refrigerating devices in ink and dampening units 40
8.10 Powder-spraying devices 40
8.11 Hazardous emissions of sheet-fed presses 40
8.12 Large-format inkjet digital printing machines (wide-format inkjet digital printing machines) 40
8.13 Dust protection requirements on web offset printing presses 42
8.14 Emergency stop devices and stop/safe pushbuttons at stationary control stands of web offset printing presses 42

9 Additional requirements for functions, operations, colours and mechanical specificationsofmanualcontroldevices 42
9.1 General 42
9.2 Emergency stop device and ink, dampening, metering, flexo or fountain rollers 43
9.3 Emergency stop devices on auxiliary draw nips 43
9.4 Emergency stop device and inkjet printing heads 43
9.5 Ready pushbutton 43
9.6 Plate position control 43

10 Control systems for screen printing presses 44

11 Safety requirements for prepress equipment 44
11.1 Electrical equipment of prepress machinery 44
11.2 Electric/electronic control systems of prepress machinery 44
11.3 Exposing equipment 44
11.4 Safeguarding the discharge of liquids 44
11.5 Safeguarding in-running nips on engraving machines 44
11.6 Safeguarding bending unit on printing plate bending machines 45
11.7 Safeguarding printing plate punching devices 45

12 Signals and warning devices for automatic machine mode with double-push sequence 45

13 Controlzonesforwebpresseshavingmultiplefolders 46

14 Verificationofsafetyrequirementsand/orprotective/riskreductionmeasures 46

15 ofinstructionhandbook 49
15.1 General 49
15.2 Sheet-fed printing press systems 49
15.2.1 Residual risk from ink ducts 49
15.2.2 Residual risks in sheet delivery area 49
15.2.3 Sheet-fed presses used for printing on board or metal sheet 49

15.2.4 Rollers 49
15.2.5 Powders (anti-setoff powders) 50
15.3 Web-fed printing press systems 50
15.3.1 Rollers 50
15.3.2 In-running nips 50
15.3.3 Operation by two-hand control with guard open 50
15.4 Screen printing presses 50
15.4.1 Ventilation and admissible liquids 50
15.4.2 Access between screen printing frame and machine frame 50
15.4.3 Use of different size screens 50
15.4.4 Crushing point between doctor blade and screen or machine table 50
15.4.5 Residual risks related to doctor blade 51
15.5 Automatic cylinder and roller washing device 51
15.6 Continuous-flow drying devices 51
15.6.1 General instructions 51
15.6.2 Inks and coatings 51
15.6.3 Solvents 51
15.6.4 Mist of UV inks and UV coatings 51
15.6.5 Solvents for manual washing 51
15.7 Oxidizers, incinerators and thermal cleaning plants 52
15.8 Alcohol dosing devices 52
15.9 Washing equipment for printing plates 52
15.10 Prepress machinery 52
15.11 Large-format inkjet digital printing machines 52
15.12 Handling of encraved cylinders 52
15.13 Fire protection on printing machines 53

Annex A (informative)Listofsignificanthazards 54

Annex B (informative) Emission levels of sheet-fed presses resulting from tests conducted in Europe 60
