ISO 8528-3:2020 (E)

Reciprocating internal combustion engine driven alternating current generating sets — Part 3: Alternating current generators for generating sets

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 Other requirements and additional regulations

6 Rating

7 Operation of a.c. generators

7.1 Isochronous (stand-alone) operation
7.2 Parallel operation without grid
7.3 Parallel operation with grid
7.3.1 General
7.3.2 Excitation system
7.3.3 Reactive power control
7.3.4 Limiter functions
7.3.5 Power system stabilizer (optional)
7.4 Effects of electromechanical vibration and its frequency

8 Special load conditions

8.1 General
8.2 Unbalanced load current
8.3 Sustained short-circuit current
8.4 Occasional excess current capability
8.5 Total harmonic distortion (THD)
8.6 Emission of electromagnetic fields (EMF)

9 Operating limits

9.1 Limits of temperature and temperature rise
9.2 Operating limit values

10 Rating plate

11 Bearings

11.1 General
11.2 Rolling bearings
11.3 Plain bearings

12 Maintenance

Annex A (informative) Transient voltage characteristic following a sudden change of load

A.1 General
A.2 Voltage recorder performance
A.3 Motor starting loads
A.3.1 General
A.3.2 Load simulation
A.3.3 Temperature
A.4 Presentation of data
A.5 Examples
