

ISO 8210:2021 (E)

Equipment for harvesting — Combine harvesters — Test procedure and performance assessment

Contents

	Foreword
1	Scope
2	Normative references
3	Terms and definitions
4	General requirements
5	Characteristics of machine
5.1	Significant details
5.2	Speeds
5.3	Configurations
5.4	Dimensions
5.5	Other measurements
5.5.1	Cylinders and rotors
5.5.2	Concaves
5.5.3	Separating devices
5.5.4	Straw walker
5.5.5	Conveying devices
5.5.6	Sieves and sieve area
5.5.7	Dirt screens, recleaners and other auxiliary cleaning devices
5.5.8	Permeable surfaces
5.5.9	Functional components
5.6	Other characteristics
5.7	Position of centre of gravity
5.8	Grain tank
6	Functional field tests
6.1	General
6.2	Information to be recorded
6.3	Behaviour and performance of combine harvester
6.3.1	General
6.3.2	Functional aspects
6.3.3	Comfort, convenience and safety
6.3.4	Ease of adjustment and routine maintenance
6.3.5	Repairs
7	Capacity tests
7.1	General
7.2	Crop selection and field conditions
7.3	Test and comparison combine harvesters
7.4	Adjustment of test and comparison combine harvesters
7.5	Catching apparatus
7.6	Conditions and procedure for collecting catch
7.7	Treatment and analysis of catches
7.8	Test data
7.9	Calculations
7.10	Graphical presentation of results to obtain capacity
8	Test report
8.1	General

8.2 Functional field tests

8.3 Capacity tests

Annex A (normative) Tests on sloping ground

Annex B (informative) Example calculations for a test run

B.1 Example values for a single point from a single run

B.2 Sample calculations from Table B.1 data
