ISO 23582-1:2023-03 (E)

Plastics and rubber machines - Clamping systems - Part 1: Safety requirements for magnetic clamping systems

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Safety requirements and/or protective/risk reduction measures 3
4.1 General 3
4.2 Magnets 3
4.3 Magnetic plate(s) 3
4.4 Magnetizing/demagnetizing current 3
4.5 Magnetic clamping control system 3
4.5.1 Magnetic clamping control system detection requirements 3
4.5.2 Magnetic clamping control system magnetizing/demagnetizing 3
4.5.3 Magnetic clamping control system enabling machine movements 4
4.6 Magnetic clamping system force 4
4.6.1 General 4
4.6.2 Magnetic clamping system force when the MCS is integrated in horizontal machines 4
4.6.3 Magnetic clamping system force when the MCS is integrated in vertical machines 4
4.7 Electrical hazards and hazards due to electromagnetic interference 5
4.7.1 General 5
4.7.2 Basic protection 5
4.7.3 Fault protection 5
4.7.4 Protection against ingress of solids and liquids 5
4.7.5 Protection against electromagnetic interference 5

5 Verificationofsafetyrequirementsand/orprotective/riskreductionmeasures 5

6 Information for the integration and the use of the MCS 6
6.1 Instruction for the integration of the MCS in a plastics and rubber machine 6
6.1.1 General 6
6.1.2 Forces acting against the magnetic clamping system force 6
6.1.3 Machine movements 7
6.1.4 Signals from the machine to the MCS 7
6.2 Instruction for the use of an MCS in a plastics and rubber machine 7

7 Marking 8
