DIN EN ISO 25745-2:2024-05 (E)

Energy performance of lifts, escalators and moving walks - Part 2: Energy calculation and classification for lifts (elevators) (ISO 25745-2:2015, Corrected version 2015-12-15 + Amd 1:2023) (includes Amendment A1:2023)

European foreword ... **3**

A1 European foreword to Amendment A1 ... **4**

A1 Foreword to Amendment A1 ... **5**

Introduction ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **8**

4 Data collection and analysis tools ... **8**

5 Calculation of energy consumption ... **9**

5.1 Methodology ... 9

5.2 Calculation of running energy per day ... 9

5.2.1 Usage and number of starts per day ... 9

5.2.2 Average travel distance ... 10

5.2.3 Average running energy per metre ... 11

5.2.4 Start/stop energy consumption ... 11

5.2.5 Running energy of an average cycle with empty car ... 11

5.2.6 Daily running energy ... 12

5.3 Calculation of non-running (idle/standby) energy consumption per day ... 13

5.3.1 Running time per day ... 13

5.3.2 Non-running time per day ... 13

5.3.3 Time ratios of idle/standby modes ... 14

5.3.4 Daily non-running (idle/standby) energy consumption ... 14

5.4 Total energy consumption per day ... 14

5.5 Total energy consumption per year ... 15

5.6 Method for determining the daily energy consumption for energy storage systems ... 15

6 Lift energy efficiency classification ... **15**

6.1 Rationale ... 15

6.2 Performance level for running ... 16

6.3 Performance levels for idle/standby ... 16

6.4 Classification of energy performance of the lift ... 16

7 Specific running energy for the reference cycle ... **17**

8 Reporting ... **17**

Annex A (informative) **Specific usage category** ... **19**

Annex B (informative) **Example calculation** ... **20**

Annex C (informative) **Symbols** ... **22**

Bibliography ... **24**
