Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Symbols and abbreviated terms ... **2**

5 General description of the design ... **2**
5.1 Components ... 2
5.2 Mode of operation ... 3

6 Specifications of the ionisation vacuum gauge ... **4**
6.1 General specifications and requirements for the gauge head ... 4
6.2 Electrical equipment ... 5

7 Dimensions and potentials ... **6**
7.1 General ... 6
7.2 Dimensions and tolerances ... 7
7.3 Potentials ... 9
7.4 Cathode ... 9
7.5 Anode cage ... 9
7.6 Gaps between electrodes ... 10
7.7 Electrode materials ... 10
7.8 Electrical feedthroughs ... 10
7.9 Surrounding tube (envelope) and flanges ... 10
7.10 Magnetic fields ... 10

8 Characteristics of the gauge (informative) ... **11**
8.1 Sensitivity ... 11
8.2 Linearity ... 11
8.3 Electron transmission efficiency ... 11
8.4 Residual current and resolution ... 11
8.5 Repeatability ... 11
8.6 Reproducibility ... 12
8.7 Interference ... 12
8.8 Temperature of electrodes ... 12
8.9 Environmental conditions ... 12

9 Handling of and measurement with the gauge ... **12**
9.1 Orientation of the gauge head ... 12
9.2 Environmental conditions ... 12
9.3 Conditioning of the gauge ... 12
9.4 Testing ... 12
9.5 Warm-up time ... 13
9.6 Sensitivity and calibration ... 13
9.7 Measurement ... 13
9.8 Transport ... 13
9.9 Cathode exchange ... 13

Annex A (Informative) **Electron and ion trajectories of recommended gauge dimensions according to simulation** ... **14**

Bibliography ... **15**
