ISO 21360-6:2023-12 (E)

Vacuum technology - Standard methods for measuring vacuum-pump performance - Part 6: Cryogenic vacuum pumps

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Symbols ... **2**

5 Test methods ... **3**

5.1 Test gas ... 3

5.2 Measurement of the volume flow rate (pumping speed) ... 3

5.2.1 General ... 3

5.2.2 Pretreatment procedure ... 3

5.2.3 Volume flow rate (pumping speed) measurement by the throughput method ... 3

5.2.4 Volume flow rate (pumping speed) measurement by the orifice method ... 3

5.2.5 Measurement of water vapour volume flow rate (pumping speed) ... 4

5.3 Maximum throughput measurement ... 4

5.3.1 General ... 4

5.3.2 Measurement method ... 4

5.3.3 Measurement setup ... 4

5.3.4 Measuring procedure ... 4

5.4 Pumping capacity measurement ... 4

5.4.1 General ... 4

5.4.2 Measurement setup ... 5

5.4.3 Measuring procedure ... 5

5.5 Measurement of base pressure cryogenic vacuum pump ... 5

5.6 Measurement of cooldown time ... 5

5.6.1 General ... 5

5.6.2 Measurement setup ... 6

5.6.3 Measuring procedure ... 6

5.7 Measurement of crossover value ... 6

5.7.1 General ... 6

5.7.2 Measurement setup ... 6

5.7.3 Measuring procedure ... 8

6 Test report ... **8**

6.1 Content ... 8

6.2 Report on general information ... 9

6.3 Report on pump parameters ... 9

6.4 Report on test equipment and conditions ... 9

6.5 Report on operational parameters ... 9

6.6 Report on pump performance ... 9

Annex A (informative) **The volume flow rate calculation for the water vapour** ... **11**

Bibliography ... **12**
