# ISO 22484:2024-11 (E)

## Displacement and dynamic compressors - Performance test code for electric driven low-pressure air compressor packages

## Contents

Page

**Foreword** ..... **v**

**Introduction** ..... **vi**

**1 Scope** ..... **1**

**2 Normative references** ..... **1**

**3 Terms and definitions** ..... **1**

**4 Units** ..... **6**

**5 Guarantee and measurement** ..... **8**
5.1 Packaged compressor ..... 8
5.2 Preconditions of the guarantee ..... 8
5.3 Object of the guarantee ..... 9
5.4 Low-pressure compressor to be tested ..... 9
5.5 Low-pressure compressor specifications to be provided prior to testing ..... 10

**6 Measuring equipment, methods and accuracy** ..... **10**
6.1 General ..... 10
6.2 Measurement of pressure ..... 10
6.2.1 General ..... 10
6.2.2 Atmospheric pressure ..... 11
6.2.3 Pressure measurement for ambient inlet ..... 11
6.2.4 Pressure measurement for piped inlet ..... 11
6.2.5 Pressure measurement for piped discharge ..... 11
6.3 Measurement of temperature ..... 11
6.3.1 General ..... 11
6.3.2 Temperature measurement for ambient inlet ..... 12
6.3.3 Temperature measurement for piped inlet ..... 12
6.3.4 Temperature measurement for piped discharge ..... 12
6.4 Measurement of humidity ..... 12
6.5 Measurement of rotational frequency ..... 12
6.6 Measurement of flow rate ..... 12
6.7 Measurement of external coolant flow rate ..... 12
6.8 Measurement of power and energy ..... 12
6.8.1 General ..... 12
6.9 Calibration of instruments ..... 13

**7 Test** ..... **13**
7.1 General test process ..... 13
7.2 Allowed deviation of rotational speed between test and guarantee ..... 14
7.3 Allowed deviation of ambient conditions ..... 15
7.3.1 Testing against general performance data ..... 15
7.3.2 Testing against customer specified data sheets ..... 15
7.4 Allowed deviation of preconditions ..... 15
7.5 Allowed deviation of machine Mach number ..... 15
7.6 Selection of test flow ..... 16
7.6.1 Selection of flow setting ..... 16
7.7 Selection of test pressure ..... 16
7.7.1 Note: The following terms are required for $R_{te}$ and $K_{te}$ with formulae and source. ..... 16
7.7.2 For positive displacement low-pressure compressors with or without internal compression ..... 16
7.7.3 For dynamic low-pressure compressors ..... 17

7.8 Allowed deviation of flow and work coefficient ..... 17
7.8.1 Allowed deviations to be checked for test validity ..... 17
7.9 Fluctuations on the specific test readings/results during test at steady state ..... 17
7.10 Two-speed test ..... 18
7.10.1 General ..... 18
7.10.2 First test ..... 18
7.10.3 Second test ..... 18

**8 Correction of test results ..... 19**
8.1 General ..... 19
8.2 Correction of measured flow (variable speed packaged compressors, only) ..... 19
8.3 Correction of measured pressure ..... 19
8.3.1 For dynamic low-pressure packaged compressors ..... 19
8.3.2 For positive displacement low-pressure packaged compressors ..... 20
8.3.3 For positive displacement and dynamic low-pressure packaged compressors ..... 20
8.4 Correction of specific energy demand ..... 20
8.5 Corrected packaged compressor power consumption ..... 21
8.6 Power correction of the two-speed test ..... 21
8.7 Calculated package isentropic efficiency ..... 21
8.8 Comparison of corrected values with guaranteed values ..... 22
8.9 Examples of calculations ..... 22

**9 Test report ..... 23**
9.1 Test report content ..... 23
9.2 Test results summary ..... 23

**Annex A** (normative) **Equipment checklist ..... 24**

**Annex B** (informative) **Test result summary ..... 25**

**Annex C** (informative) **Examples of acceptance test reports/calculations ..... 26**

**Annex D** (informative) **Background of thermodynamics ..... 50**

**Bibliography ..... 57**
