IEC/TR 63319:2025-06 (E)

A meta-modelling analysis approach to smart manufacturing reference models

Contents

Page

FOREWORD....10
INTRODUCTION....12
1 Scope....13
2 Normative references....13
3 Terms and definitions, abbreviated terms, acronyms and conventions....13
3.1 Terms and definitions....13
3.2 Convention used for term and definition selection....15
3.3 Abbreviations and acronyms....16
3.4 Conventions used for selected references....17
4 Smart manufacturing (SM)....18
4.1 Introduction to and vision of SM....18
4.2 SM characteristics and differences from conventional manufacturing....18
4.3 Essential concepts and enabling technologies for SM....19
4.3.1 SM categories....19
4.3.2 Generic methods....19
4.3.3 Applications in the manufacturing domain....20
4.3.4 Information and communication technologies....20
5 Smart manufacturing reference model (SMRM)....21
5.1 Need for a SMRM....21
5.2 Objectives in more detail....21
5.3 SMRM focus....22
5.4 Reference modelling....22
5.5 Usage of a reference model: the OSI model....22
5.6 SMRM harmonization needs....22
5.7 SMRM abstraction stack....23
6 SMRM meta-modelling approach....23
6.1 General....23
6.2 Objectives....24
6.3 Assumptions, constraints and guidance....24
6.3.1 Assumptions....24
6.3.2 Constraints....24
6.3.3 Guidance....24
6.4 Concepts....25
6.4.1 General....25
6.4.2 Concepts of the meta-model....25
6.4.3 Proposition of the meta-model for SMRM....27
6.5 Meta-model for SMRM visualization....29
6.6 **Facet_composition_rules* and **aspect_collection_coherence_rules*....29
6.7 Utilizing the meta-model concept of use case....30
6.7.1 General....30
6.7.2 **Use_cases* for articulating concerns....31

6.7.3 *Viewpoints* capture concerns and specify views 32
6.7.4 Examples of **model_content_purpose* 33
7 Mapping of the contributions for SMRMs to the SMRM meta-model 34
7.1 General 34
7.2 Mapping for Scandinavian smart manufacturing model 35
7.2.1 Graphical depiction of SSIF mapping 35
7.2.2 SSIF **facet_composition_rule* 35
7.2.3 Business dimension **aspect_collection* 36
7.2.4 Product dimension **aspect_collection* 36
7.2.5 Production dimension **aspect_collection* 37
7.2.6 Space Time dimension (Life cycle) **aspect_collection* 37
7.3 Mapping for RAMI 4.0 38
7.3.1 Graphical depiction of RAMI 4.0 mapping 38
7.3.2 RAMI 4.0 – *facet_composition_rule 40
7.3.3 Service oriented architecture as a universal technical approach 40
7.3.4 Layers **aspect_collection_coherence_rule* 41
7.3.5 Hierarchy Levels **aspect_collection_coherence_rule* 42
7.3.6 Life cycle **aspect_collection_coherence_rule* 42
7.4 Mapping for IMSA 43
7.4.1 Graphical depiction of IMSA mapping 43
7.4.2 System Hierarchy **aspect_collection_coherence_rule* 44
7.4.3 Life Cycle **aspect_collection_coherence_rule* 45
7.4.4 Intelligent Function **aspect_collection_coherence_rule* 45
7.5 Mapping for ISO 15704:2019, Annex B – GERAM 46
7.5.1 Graphical depiction of ISO 15704:2019, Annex B – GERAM 46
7.5.2 GERAM **facet_composition_rules* 46
7.5.3 Life cycle phases **aspect_collection_coherence_rule* 47
7.5.4 Modelling viewpoints **aspect_collection_coherence_rule* 47
7.5.5 Instantiation **aspect_collection_coherence_rule* 48
7.5.6 Manifestation **aspect_collection_coherence_rule* 48
7.5.7 Purpose **aspect_collection_coherence_rule* 48
7.5.8 Implementation **aspect_collection_coherence_rule* 49
7.6 Mapping for NIST Smart Manufacturing Standards Landscape 50
7.6.1 Graphical depiction of NIST Smart Manufacturing Standards Landscape mapping 50
7.6.2 NIST **facet_composition_rules* 50
7.6.3 Business life cycle **aspect_collection_coherence_rule* 51
7.6.4 Product life cycle *aspect_collection_coherence_rule 52
7.6.5 Production life cycle **aspect_collection_coherence_rule* 52
7.6.6 Manufacturing pyramid **aspect_collection_coherence_rule* 53
7.7 Mapping for KSTEP cube framework 54
7.7.1 Graphical depiction of KSTEP cube framework mapping 54
7.7.2 Space axis 1 **aspect_collection_coherence_rule* 54
7.7.3 Space axis 2 **aspect_collection_coherence_rule* 54
7.7.4 Time axis t **aspect_collection_coherence_rule* 54
7.8 Mapping for IVRA Next 55
7.8.1 Graphical depiction of IVRA Next mapping 55
7.8.2 Three axes of SM facet and SMU facet composition rules 55
7.8.3 Product axis (thing) **aspect_collection_coherence_rule* 56
7.8.4 Service axis (occurrence) **aspect_collection_coherence_rule* 56
7.8.5 Knowledge axis **aspect_collection_coherence_rule* 56
7.8.6 Asset view **aspect_collection_coherence_rule* 57
7.8.7 Management view **aspect_collection_coherence_rule* 57
7.8.8 Activity view **aspect_collection_coherence_rule* 58

7.9 Mapping for IIC Industrial Internet Reference Architecture 59
7.9.1 Graphical depiction of IIC IIRA mapping 59
7.10 Mapping for Smart Manufacturing Standards Map (SM2) 60
7.10.1 Graphical depiction of Smart Manufacturing Standards Map (SM2) 60
7.10.2 SM2 **facet_composition_rules* 62
7.11 Mapping for URM-MM 62
7.11.1 Graphical depiction of URM-MM 62
7.11.2 URM-MM **facet_composition_rules* 63
7.11.3 Model/Organization **aspect_collection_coherence_rule* 63
7.11.4 URM-MM **aspect_collection_coherence_rule* 64
8 Analysis of particular collections of aspects 64
8.1 Identification of a set of common **aspects_collections* 64
8.2 Life cycle 65
8.2.1 General 65
8.2.2 Overview on contributions for SMRMs 65
8.2.3 Particularities of contributions for SMRMs with respect to life cycle 67
8.2.4 Fundamental questions concerning life cycle aspects of a SMRM 70
8.2.5 Observed consequences to the life cycle questions 70
8.2.6 Outlook 72
8.3 Hierarchy 72
8.3.1 General 72
8.3.2 Overview on contributions for SMRMs with respect to hierarchy 72
8.3.3 Particularities of contributions for SMRMs with respect to hierarchy 73
8.3.4 Fundamental questions concerning hierarchy aspects of a SMRM 78
8.3.5 Observed consequences to the hierarchy questions 78
8.3.6 Outlook 79
8.4 Layer 79
8.4.1 General 79
8.4.2 Overview on contributions for SMRMs 80
8.4.3 Particularities of contributions for SMRMs with respect to layer 81
8.4.4 Fundamental questions concerning layer aspects of a SMRM 82
8.4.5 Observed consequences to the layer questions 82
8.4.6 Outlook 83
8.5 Additional aspects 85
8.5.1 General 85
8.5.2 Fundamental questions concerning additional **aspect_collections* of a SMRM 85
8.5.3 Observed consequences to the additional **aspect_collections* questions 85
9 Toward a family of SMRM representations 88
9.1 Expectations for a unifying SMRM 88
9.2 Identification of generic (timeless) principles for SMRM 89
9.3 Structurally addressing the missing smart technologies 90
9.4 Observations from mapping and analysis 91
9.5 Candidate **aspect_collection_coherence_rules* and **facet_composition_rules* 92
9.6 The family of SMRM representations 93
9.7 The case for **use_case* 94
9.8 Approaching creation of the SMRM 95
Annex A (informative) Objectives and terms of reference for JWG 21 97

A.1 Objectives 97
A.2 Terms of reference 97
Annex B (informative) Contributions for SMRMs 98
B.1 RAMI 98
B.1.1 General 98
B.1.2 Layer axis 99
B.1.3 Life cycle axis in RAMI 4.0 101
B.2 IMSA 105
B.2.1 Intelligent manufacturing system framework 105
B.2.2 Life cycle 105
B.2.3 System hierarchy 106
B.2.4 Intelligence characteristics 106
B.2.5 Structural diagram of intelligent manufacturing standard system 107
B.3 GERAM 109
B.3.1 Rationale for enterprise-reference architecture and methodologies 109
B.3.2 Generalized enterprise-reference architecture and methodologies 109
B.3.3 Framework for enterprise architecture and enterprise integration 111
B.4 NIST Smart Manufacturing EcoSystem and Standards Landscape 115
B.5 KSTEP cube framework for standards 117
B.5.1 Skeleton meta-model 117
B.5.2 KSTEP cube framework 119
B.6 IVRA Next 121
B.6.1 General 121
B.6.2 Overview 121
B.6.3 Evolutional Model in Manufacturing 125
B.7 ISO/TC 184 Automation systems and integration – the Big Picture of standards (ISO TR 23087:2018 [40]) 130
B.7.1 History 130
B.7.2 Purpose 131
B.7.3 Summary of axis and facets of the ISO/TC 184 Big picture of standards diagram and matrix 133
B.8 AIF framework and reference model for SM Standard Landscape (France) 134
B.8.1 History 134
B.8.2 Purpose 134
B.8.3 Summary of facets and blocks of the AIF RM for SM Standard Landscape 136
B.9 ISO-IEC Smart Manufacturing Standards Landscape (SM2) 138
B.9.1 History 138
B.9.2 Terms of reference 139
B.9.3 SM2 framework 139
B.9.4 SM2 vocabulary 142
B.10 URM-MM 144
B.10.1 Background 144
B.10.2 Overview 144
B.10.3 Usage 145
B.10.4 Practical use-case 145
B.10.5 Illustration of Relevant International Standards Mapping 149
B.11 Scandinavian model 151
B.11.1 Scandinavian Semantic Model Design Principles 151

B.11.2 Domain Semantic Model exemplified by Product Dimension 153
B.12 UK Model 155
Annex C (informative) Definition of smart manufacturing, and interpretations 157
Annex D (informative) Concepts of Meta-modelling 158
Bibliography 160
