

IEC/TR 63319:2025-06 (E)

A meta-modelling analysis approach to smart manufacturing reference models

Contents	Page
FOREWORD.....	10
INTRODUCTION.....	12
1 Scope.....	13
2 Normative references.....	13
3 Terms and definitions, abbreviated terms, acronyms and conventions.....	13
3.1 Terms and definitions.....	13
3.2 Convention used for term and definition selection.....	15
3.3 Abbreviations and acronyms.....	16
3.4 Conventions used for selected references.....	17
4 Smart manufacturing (SM).....	18
4.1 Introduction to and vision of SM.....	18
4.2 SM characteristics and differences from conventional manufacturing.....	18
4.3 Essential concepts and enabling technologies for SM.....	19
4.3.1 SM categories.....	19
4.3.2 Generic methods.....	19
4.3.3 Applications in the manufacturing domain.....	20
4.3.4 Information and communication technologies.....	20
5 Smart manufacturing reference model (SMRM).....	21
5.1 Need for a SMRM.....	21
5.2 Objectives in more detail.....	21
5.3 SMRM focus.....	22
5.4 Reference modelling.....	22
5.5 Usage of a reference model: the OSI model.....	22
5.6 SMRM harmonization needs.....	22
5.7 SMRM abstraction stack.....	23
6 SMRM meta-modelling approach.....	23
6.1 General.....	23
6.2 Objectives.....	24
6.3 Assumptions, constraints and guidance.....	24
6.3.1 Assumptions.....	24
6.3.2 Constraints.....	24
6.3.3 Guidance.....	24
6.4 Concepts.....	25
6.4.1 General.....	25
6.4.2 Concepts of the meta-model.....	25
6.4.3 Proposition of the meta-model for SMRM.....	27
6.5 Meta-model for SMRM visualization.....	29
6.6 <i>*Facet_composition_rules</i> and <i>*aspect_collection_coherence_rules</i>	29
6.7 Utilizing the meta-model concept of use case.....	30
6.7.1 General.....	30
6.7.2 <i>*Use_cases</i> for articulating concerns.....	31

6.7.3	* <i>Viewpoints</i> capture concerns and specify views	32
6.7.4	Examples of * <i>model_content_purpose</i>	33
7	Mapping of the contributions for SMRMs to the SMRM meta-model.....	34
7.1	General.....	34
7.2	Mapping for Scandinavian smart manufacturing model	35
7.2.1	Graphical depiction of SSIF mapping	35
7.2.2	SSIF * <i>facet_composition_rule</i>	35
7.2.3	Business dimension * <i>aspect_collection</i>	36
7.2.4	Product dimension * <i>aspect_collection</i>	36
7.2.5	Production dimension * <i>aspect_collection</i>	37
7.2.6	Space Time dimension (Life cycle) * <i>aspect_collection</i>	37
7.3	Mapping for RAMI 4.0.....	38
7.3.1	Graphical depiction of RAMI 4.0 mapping	38
7.3.2	RAMI 4.0 – * <i>facet_composition_rule</i>	40
7.3.3	Service oriented architecture as a universal technical approach	40
7.3.4	Layers * <i>aspect_collection_coherence_rule</i>	41
7.3.5	Hierarchy Levels * <i>aspect_collection_coherence_rule</i>	42
7.3.6	Life cycle * <i>aspect_collection_coherence_rule</i>	42
7.4	Mapping for IMSA	43
7.4.1	Graphical depiction of IMSA mapping	43
7.4.2	System Hierarchy * <i>aspect_collection_coherence_rule</i>	44
7.4.3	Life Cycle * <i>aspect_collection_coherence_rule</i>	45
7.4.4	Intelligent Function * <i>aspect_collection_coherence_rule</i>	45
7.5	Mapping for ISO 15704:2019, Annex B – GERAM	46
7.5.1	Graphical depiction of ISO 15704:2019, Annex B – GERAM.....	46
7.5.2	GERAM * <i>facet_composition_rules</i>	46
7.5.3	Life cycle phases * <i>aspect_collection_coherence_rule</i>	47
7.5.4	Modelling viewpoints * <i>aspect_collection_coherence_rule</i>	47
7.5.5	Instantiation * <i>aspect_collection_coherence_rule</i>	48
7.5.6	Manifestation * <i>aspect_collection_coherence_rule</i>	48
7.5.7	Purpose * <i>aspect_collection_coherence_rule</i>	48
7.5.8	Implementation * <i>aspect_collection_coherence_rule</i>	49
7.6	Mapping for NIST Smart Manufacturing Standards Landscape	50
7.6.1	Graphical depiction of NIST Smart Manufacturing Standards Landscape mapping.....	50
7.6.2	NIST * <i>facet_composition_rules</i>	50
7.6.3	Business life cycle * <i>aspect_collection_coherence_rule</i>	51
7.6.4	Product life cycle * <i>aspect_collection_coherence_rule</i>	52
7.6.5	Production life cycle * <i>aspect_collection_coherence_rule</i>	52
7.6.6	Manufacturing pyramid * <i>aspect_collection_coherence_rule</i>	53
7.7	Mapping for KSTEP cube framework.....	54
7.7.1	Graphical depiction of KSTEP cube framework mapping	54
7.7.2	Space axis 1 * <i>aspect_collection_coherence_rule</i>	54
7.7.3	Space axis 2 * <i>aspect_collection_coherence_rule</i>	54
7.7.4	Time axis t * <i>aspect_collection_coherence_rule</i>	54
7.8	Mapping for IVRA Next.....	55
7.8.1	Graphical depiction of IVRA Next mapping.....	55
7.8.2	Three axes of SM facet and SMU facet composition rules	55
7.8.3	Product axis (thing) * <i>aspect_collection_coherence_rule</i>	56
7.8.4	Service axis (occurrence) * <i>aspect_collection_coherence_rule</i>	56
7.8.5	Knowledge axis * <i>aspect_collection_coherence_rule</i>	56
7.8.6	Asset view * <i>aspect_collection_coherence_rule</i>	57
7.8.7	Management view * <i>aspect_collection_coherence_rule</i>	57
7.8.8	Activity view * <i>aspect_collection_coherence_rule</i>	58

7.9	Mapping for IIC Industrial Internet Reference Architecture.....	59
7.9.1	Graphical depiction of IIC IIRA mapping	59
7.10	Mapping for Smart Manufacturing Standards Map (SM2).....	60
7.10.1	Graphical depiction of Smart Manufacturing Standards Map (SM2).....	60
7.10.2	SM2 <i>*facet_composition_rules</i>	62
7.11	Mapping for URM-MM	62
7.11.1	Graphical depiction of URM-MM	62
7.11.2	URM-MM <i>*facet_composition_rules</i>	63
7.11.3	Model/Organization <i>*aspect_collection_coherence_rule</i>	63
7.11.4	URM-MM <i>*aspect_collection_coherence_rule</i>	64
8	Analysis of particular collections of aspects.....	64
8.1	Identification of a set of common <i>*aspects_collections</i>	64
8.2	Life cycle	65
8.2.1	General	65
8.2.2	Overview on contributions for SMRMs	65
8.2.3	Particularities of contributions for SMRMs with respect to life cycle	67
8.2.4	Fundamental questions concerning life cycle aspects of a SMRM.....	70
8.2.5	Observed consequences to the life cycle questions.....	70
8.2.6	Outlook.....	72
8.3	Hierarchy	72
8.3.1	General	72
8.3.2	Overview on contributions for SMRMs with respect to hierarchy	72
8.3.3	Particularities of contributions for SMRMs with respect to hierarchy	73
8.3.4	Fundamental questions concerning hierarchy aspects of a SMRM.....	78
8.3.5	Observed consequences to the hierarchy questions	78
8.3.6	Outlook.....	79
8.4	Layer	79
8.4.1	General	79
8.4.2	Overview on contributions for SMRMs	80
8.4.3	Particularities of contributions for SMRMs with respect to layer	81
8.4.4	Fundamental questions concerning layer aspects of a SMRM.....	82
8.4.5	Observed consequences to the layer questions	82
8.4.6	Outlook.....	83
8.5	Additional aspects	85
8.5.1	General	85
8.5.2	Fundamental questions concerning additional <i>*aspect_collections</i> of a SMRM	85
8.5.3	Observed consequences to the additional <i>*aspect_collections</i> questions	85
9	Toward a family of SMRM representations	88
9.1	Expectations for a unifying SMRM	88
9.2	Identification of generic (timeless) principles for SMRM.....	89
9.3	Structurally addressing the missing smart technologies	90
9.4	Observations from mapping and analysis	91
9.5	Candidate <i>*aspect_collection_coherence_rules</i> and <i>*facet_composition_rules</i>	92
9.6	The family of SMRM representations	93
9.7	The case for <i>*use_case</i>	94
9.8	Approaching creation of the SMRM.....	95
Annex A (informative)	Objectives and terms of reference for JWG 21	97

A.1	Objectives.....	97
A.2	Terms of reference.....	97
Annex B (informative)	Contributions for SMRMs	98
B.1	RAMI	98
B.1.1	General	98
B.1.2	Layer axis.....	99
B.1.3	Life cycle axis in RAMI 4.0	101
B.2	IMSA	105
B.2.1	Intelligent manufacturing system framework.....	105
B.2.2	Life cycle	105
B.2.3	System hierarchy	106
B.2.4	Intelligence characteristics	106
B.2.5	Structural diagram of intelligent manufacturing standard system	107
B.3	GERAM	109
B.3.1	Rationale for enterprise-reference architecture and methodologies.....	109
B.3.2	Generalized enterprise-reference architecture and methodologies.....	109
B.3.3	Framework for enterprise architecture and enterprise integration	111
B.4	NIST Smart Manufacturing EcoSystem and Standards Landscape.....	115
B.5	KSTEP cube framework for standards.....	117
B.5.1	Skeleton meta-model	117
B.5.2	KSTEP cube framework	119
B.6	IVRA Next.....	121
B.6.1	General	121
B.6.2	Overview	121
B.6.3	Evolutional Model in Manufacturing	125
B.7	ISO/TC 184 Automation systems and integration – the Big Picture of standards (ISO TR 23087:2018 [40])	130
B.7.1	History.....	130
B.7.2	Purpose.....	131
B.7.3	Summary of axis and facets of the ISO/TC 184 Big picture of standards diagram and matrix	133
B.8	AIF framework and reference model for SM Standard Landscape (France)	134
B.8.1	History.....	134
B.8.2	Purpose.....	134
B.8.3	Summary of facets and blocks of the AIF RM for SM Standard Landscape	136
B.9	ISO-IEC Smart Manufacturing Standards Landscape (SM2)	138
B.9.1	History.....	138
B.9.2	Terms of reference.....	139
B.9.3	SM2 framework.....	139
B.9.4	SM2 vocabulary	142
B.10	URM-MM	144
B.10.1	Background	144
B.10.2	Overview	144
B.10.3	Usage.....	145
B.10.4	Practical use-case.....	145
B.10.5	Illustration of Relevant International Standards Mapping.....	149
B.11	Scandinavian model	151
B.11.1	Scandinavian Semantic Model Design Principles	151

B.11.2	Domain Semantic Model exemplified by Product Dimension	153
B.12	UK Model.....	155
Annex C (informative)	Definition of smart manufacturing, and interpretations	157
Annex D (informative)	Concepts of Meta-modelling.....	158
Bibliography	160
Figure 1	– Example of transition from centralized to distributed system paradigm.....	18
