ISO/TR 6049:2026-09 (E)

Hydraulic fluid power - Procedures used to certify the standard reference material SRM 2806d used in ISO 11171

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Equipment and material 2
4.1 Test powder 2
4.1.1 Reference material for SRM 2806d 2
4.1.2 Reference materials RM 8361 and RM 8632 2
4.2 Test fluid 2
4.3 Instrumentation 2
4.4 Statistical data analysis 3

5 Material production and description of acceptance testing 3
5.1 Production of SRM 2806d 3
5.2 Automatic optical particle counter data 4
5.3 Scanning electron microscope 4
5.4 Accelerated ageing 5
5.5 Statistical analysis 5
5.5.1 General 5
5.5.2 Distributional check: histogram 6
5.5.3 Distributional check: normal probability plots 6
5.5.4 Homogeneity and stability plots 7
5.5.5 Homogeneity and stability statistics 7
5.5.6 Homogeneity and Stability Summary Graphics 7
5.6 Summary of acceptance phase 9

6 NIST Certification 10
6.1 Interlaboratory study 10
6.2 The interlaboratory study for SRM 2806d [ISO 4813][16] 10
6.3 Calibration for the ILS 12
6.4 Example of consensus values determined for SRM 2806d 12

7 Determination of cumulative particle concentration for SRM 2806d by microscopy 17
7.1 General 17
7.2 Uncertified results for SRM 2806d microscopy analysis 17
7.3 Comparison of microscopy and ILS results for SRM 2806d 19
7.4 Historic microscopy results 22

8 Summary 27

Annex A (informative) Procedure used to create SRM 2806d 29
