

ISO 8579-1:2002-08 (E)

Acceptance code for gear units - Part 1: Test code for airborne sound

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		2
4 Gear configuration and acoustic environment		2
5 Sound power level determination		3
6 Determination of emission sound pressure level		16
7 Installation and mounting conditions		17
8 Operating conditions during sound measurements		18
9 Information to be recorded		19
10 Information to be reported		19
11 Declaration and verification of sound emission values		19
Annex A (informative) Examples of microphone positions on the measurement surface for different gear types and sizes		20
Annex B (informative) Typical sound levels for different gear types and sizes (sound power and sound pressure)		29
Annex C (informative) Information for the determination of airborne sound power levels using the methods of ISO 3744:1981 and ISO 3746:1979		44
Bibliography		53
