

# ISO 14694:2003-03 (E)

## Industrial fans - Specifications for balance quality and vibration levels

---

<b>Contents</b>	<b>Page</b>
Foreword .....	iv
Introduction .....	v
1 Scope .....	1
2 Normative references .....	2
3 Terms and definitions .....	2
4 Symbols and units .....	7
5 Purpose of the test .....	8
6 Balance and vibration application categories (BV categories) .....	9
7 Balancing .....	10
7.1 General .....	10
7.2 Balance quality grade .....	10
7.3 Calculation of permissible residual unbalance .....	10
8 Fan vibration .....	11
8.1 Measurement requirements .....	11
8.2 Fan support system .....	15
8.3 Fan vibration limits for tests in manufacturer's work-shop .....	15
8.4 Fan vibration limits for operation in situ .....	15
9 Other rotating components .....	16
10 Instruments and calibration .....	17
10.1 Instruments .....	17
10.2 Calibration .....	17
11 Documentation .....	17
11.1 Balance .....	17
11.2 Fan vibration .....	17
11.3 Certificates .....	18
Annex A (informative) Relationship of vibration displacement, velocity and acceleration for sinusoidal motion .....	20
Annex B (informative) Assembly practices for balancing in a balancing machine .....	22
Annex C (informative) Sources of vibrations .....	24
Annex D (informative) Equation of vibration .....	30
Annex E (informative) Vibration and supports .....	32
Annex F (informative) Out of balance and bearing reactions .....	33
Annex G (informative) Condition monitoring and diagnostic guidelines .....	36
Annex H (informative) Suggested relaxation of specified grades and levels .....	37
Bibliography .....	38
