

ISO 14694:2003-03 (E)

Industrial fans - Specifications for balance quality and vibration levels

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Symbols and units	7
5 Purpose of the test	8
6 Balance and vibration application categories (BV categories)	9
7 Balancing	10
7.1 General	10
7.2 Balance quality grade	10
7.3 Calculation of permissible residual unbalance	10
8 Fan vibration	11
8.1 Measurement requirements	11
8.2 Fan support system	15
8.3 Fan vibration limits for tests in manufacturer's work-shop	15
8.4 Fan vibration limits for operation in situ	15
9 Other rotating components	16
10 Instruments and calibration	17
10.1 Instruments	17
10.2 Calibration	17
11 Documentation	17
11.1 Balance	17
11.2 Fan vibration	17
11.3 Certificates	18
Annex A (informative) Relationship of vibration displacement, velocity and acceleration for sinusoidal motion	20
Annex B (informative) Assembly practices for balancing in a balancing machine	22
Annex C (informative) Sources of vibrations	24
Annex D (informative) Equation of vibration	30
Annex E (informative) Vibration and supports	32
Annex F (informative) Out of balance and bearing reactions	33
Annex G (informative) Condition monitoring and diagnostic guidelines	36
Annex H (informative) Suggested relaxation of specified grades and levels	37
Bibliography	38
