ISO 10303-55:2005-02 (E)

Industrial automation systems - Product data representation and exchange - Part 55: Integrated generic resource: Procedural and hybrid representation

Contents

Page

1 Scope 1

2 Normative references 2

3 Terms, definitions and abbreviations 2
3.6 Other terms and definitions 5
3.7 Abbreviations 5

4 Procedural model 6
4.1 Introduction 6
4.2 Fundamental concepts and assumptions 6
4.2.1 Procedural models 7
4.2.2 Hybrid models 8
4.2.3 Explicit selected elements 8
4.2.4 Dual models 9
4.2.5 Representation of constructional operations in procedural models 10
4.2.6 Implicit and explicit constraints 11
4.2.7 Suppression of constructional operations 12
4.2.8 Exchange of procedural and hybrid models 12
4.2.9 Variational cases of procedural and hybrid models 12
4.3 Procedural model entity definitions 13
4.3.1 explicit procedural representation relationship 13
4.3.2 explicit procedural representation item relationship 14
4.3.3 procedural representation 15
4.3.4 procedural representation sequence 16
4.3.5 user selected elements 17
4.3.6 indirectly selected elements 18

5 Procedural shape model 20
5.1 Introduction 20
5.2 Fundamental concepts and assumptions 20
5.2.1 Procedural shape models 21
5.2.2 Hybrid shape models 22
5.2.3 Explicit selected elements in a shape model 22
5.2.4 Dual shape representations 22
5.2.5 Design rationale for shape models 22
5.3 Procedural shape model type definitions 23
5.3.1 shape representation item 23
5.4 Procedural shape model entity definitions 23
5.4.1 explicit procedural shape representation relationship 23
5.4.2 explicit procedural geometric representation item relationship 24
5.4.3 procedural shape representation 25
5.4.4 procedural shape representation sequence 25
5.4.5 procedural solid representation sequence 26
5.4.6 procedural surface representation sequence 27
5.4.7 procedural wireframe representation sequence 28
5.4.8 user selected shape elements 28
5.4.9 indirectly selected shape elements 29

Annex A (normative) Short names of entities 31

Annex B (normative) Information object registration 32

B.1 Document identification 32
B.2 Schema identification 32
B.2.1 procedural model schema identification 32
B.2.2 procedural shape model schema identification 32

Annex C (informative) Computer interpretable listings 33

Annex D (informative) EXPRESS-G diagrams 34

E.1 Example of non-geometric application of procedural modelling 38
E.2 Example of intended usage of the procedural shape model schema 38
E.3 Example of the use of variational (parameterization and constraint) information with a procedural model 40
E.4 Example of the embedding of operation sequences and the recording of design rationale 45 Bibliography 47

Index 48

Figures box) and other resource schemas viii

Figure D.1 procedural model schema - EXPRESS-G diagram 1 of 1 35

Figure D.2 procedural shape model schema - EXPRESS-G diagram 1 of 2 36

Figure D.3 procedural shape model schema - EXPRESS-G diagram 2 of 2 37

Figure E.1 Relationships between instances of procedural, variational and explicit models for the cases of (a) no variational model, (b) no procedural model, and (c) all three models 42
