DIN 5480-15:2006-03 (E)

Involute splines based on reference diameters - Part 15: Inspection

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Definitions and symbols, designations and units 5
3.1 Definitions 5
3.1.1 space width/tooth thickness 5
3.1.2 Terms relating to inspection of the actual space width/tooth thickness 6
3.1.3 Terms describing the centre points of the tooth flanks 7
3.1.4 Individual deviations 7
3.2 Symbols, designations and units 8

4 Parameters to be inspected 9
4.1 General 9
4.2 Dimensions 10
4.2.1 Diameters 10
4.2.2 Space width/tooth thickness 10
4.3 Individual deviations 14
4.4 Positional deviations 14

5 Inspection procedure 15
5.1 General 15
5.1.1 Inspection of the actual space width/actual tooth thickness 15
5.1.2 Inspection of the effective space width/effective tooth thickness 15
5.1.3 Checking individual deviations 16
5.1.4 Positional deviations 16
5.2 Gauges 16
5.2.1 Types of gauge and their uses 16
5.2.2 External dimensions 17
5.2.3 Materials, surface finish and design 19
5.2.4 Inspection dimensions, tolerances and limit deviations 20
5.2.5 Gauge inspection 25
5.3 Inspection of space width/tooth thickness using indicating measuring instruments 30
5.3.1 General 30
5.3.2 Dimension between/over measuring circles 30
5.3.3 Base tangent length 32
5.3.4 Measurement uncertainty 32
5.3.5 Rules of priority 33
5.3.6 Statistical actual tolerance limit (STA) 33
5.4 Inspection of the effective space width/effective tooth thickness 34
5.4.1 Inspection taking individual deviations into account 34
5.4.2 Checking the rotational flank backlash 34
5.5 Checking individual deviations 35
5.5.1 Comparability with transmission gear splines 35
5.5.2 Effect of positional deviations on measurements 35
5.6 Checking positional deviations 35
5.6.1 Representation in workpiece drawings 35
5.6.2 Effect of individual deviations on measurements and inspection results 35
5.6.3 Actual positional deviations 35
5.6.4 Effective positional deviations 36

Annex A (informative) Comparison of new symbols and old symbols 37
