DIN EN 415-7:2006-10 (E)

Safety of packaging machines - Part 7: Group and secondary packaging machines

Contents

Page

Foreword 7

Introduction 8

1 Scope 9

2 Normative references 9

3 Terms and definitions 13
3.1 Definition of terms 13
3.2 Description of group and secondary packaging machines 15
3.2.1 Machines for erecting packaging materials 15
3.2.2 Product loading/unloading machines 17
3.2.3 Machines for sealing packages 20
3.2.4 Group package form, fill and seal machines 24

4 Hazards on group and secondary packaging machines 29
4.1 General 29
4.2 General group and secondary packaging machine hazards 30
4.2.1 General 30
4.2.2 Mechanical hazards 30
4.2.3 Electrical hazards 31
4.2.4 Thermal hazards 31
4.2.5 Noise 31
4.2.6 Hazards from products and materials 31
4.2.7 Hazards due to neglecting ergonomic principles 32
4.2.8 Hazards caused by failures 32
4.2.9 Hazards due to neglecting hygienic design principles 33
4.2.10 Common mechanisms on group and secondary packaging machines 33
4.3 Hazards associated with a tray erecting machine 34
4.3.1 General 34
4.3.2 Tray blank magazine 35
4.3.3 Tray blank extracting mechanism 35
4.3.4 Tray blank transport mechanism 35
4.3.5 Forming assembly 36
4.3.6 Discharge mechanism 36
4.4 Hazards associated with case erecting machines 36
4.4.1 General 36
4.4.2 Hazards associated with a semi-automatic case erector 36
4.4.3 Hazards associated with a fully automatic case erector 36

EN 415-7:2006 (E) EN 415-7:2006 (E) 4.5 Hazards associated with a place packing machine 38
4.5.1 General 38
4.5.2 In-feed conveyor 39
4.5.3 Product collating mechanisms 39
4.5.4 Transport mechanism 39
4.5.5 Product loading mechanism 39
4.6 Hazards associated with a horizontal case loading machine 40
4.6.1 General 40
4.6.2 Product in-feed conveyor 40
4.6.3 Product turning devices 40
4.6.4 Product collating mechanism 41

4.6.5 Case loading mechanism 41
4.6.6 Case funnel 41
4.6.7 Case support arms 41
4.6.8 Discharge conveyor 41
4.7 Hazards associated with case taping machines 41
4.7.1 General 41
4.7.2 Hazards associated with a manually adjusted case taping machine without flap tucking . 41
4.7.3 Hazards associated with a self adjusting case taping machine without flap tucking 43
4.7.4 Hazards associated with a manually adjusted case taping machine with flap tucking 44
4.7.5 Hazards associated with a fully automatic case taping machine 46
4.8 Hazards associated with a wraparound case packing machine 47
4.8.1 General 47
4.8.2 Case blank magazine 48
4.8.3 Product in-feed conveyor 49
4.8.4 Transport mechanism 49
4.8.5 Case erecting mechanism 49
4.8.6 Product loading mechanism 49
4.8.7 Flap tucking mechanisms 49
4.8.8 Case closing devices 49
4.8.9 Case compression 49
4.8.10 Discharge conveyor 49

5 Safety requirements and measures for group and secondary packaging machines 50
5.1 General 50
5.2 General requirements for group and secondary packaging machines 50
5.2.1 General 50
5.2.2 Requirements to eliminate mechanical hazards 50
5.2.3 Electrical requirements 57
5.2.4 Thermal hazards 59
5.2.5 Noise reduction 60
5.2.6 Measures to control hazards generated by products and materials 61
5.2.7 Ergonomic design principles 62
5.2.8 Requirements to prevent hazards caused by failures 63
5.2.9 Hygienic design requirements 65
5.2.10 Requirements for mechanisms used on most group and secondary packaging machines 66
5.3 Safety requirements for a tray erecting machine 68
5.3.1 General 68
5.3.2 Tray blank magazine 68
5.3.3 Tray blank extracting mechanism 69
5.3.4 Tray blank transport mechanism 69
5.3.5 Forming assembly 69
5.3.6 Discharge mechanism 69
5.4 Safety requirements for a case erecting machine 69
5.4.1 Safety requirements for a semi-automatic case erector 69
5.4.2 Safety requirements for a fully automatic case erector 70
5.5 Safety requirements for a place packing machine 71
5.5.1 General 71
5.5.2 In-feed conveyor 71
5.5.3 Product collating mechanisms 71
5.5.4 Transport mechanism 71
5.5.5 Product loading mechanism 71
5.6 Safety requirements for a horizontal case loading machine 72
5.6.1 General 72
5.6.2 In-feed conveyor - See 5.3.6.2 72
5.6.3 Product turning devices 72
5.6.4 Product stacking mechanism 72
5.6.5 Case loading mechanism 73
5.6.6 Case funnel 73
5.6.7 Case support arms 73
5.6.8 Discharge conveyor - See 5.3.6 73
5.7 Safety requirements for case taping machines 73
5.7.1 Safety requirements for a manually adjusted case taping machine without flap tucking ... 73

5.7.2 Safety requirements for a self adjusting case taping machine without flap tucking 74
5.7.3 Safety requirements for a manually adjusted case taping machine with flap tucking 74
5.7.4 Safety requirements for a fully automatic case taping machine 75
5.7.5 Noise reduction 75
5.8 Safety requirements for a wraparound case packing machine 75
5.8.1 General 75

EN 415-7:2006 (E) EN 415-7:2006 (E) 5.8.2 Case blank magazine 75
5.8.3 In-feed conveyor 75
5.8.4 Transport mechanism 76
5.8.5 Case erecting mechanism 76
5.8.6 Product loading mechanism 76
5.8.7 Flap tucking 76
5.8.8 Case closing devices - See 5.4.2.6 76
5.8.9 Case compression 76
5.8.10 Discharge conveyor 76

6 Verification of safety requirements and measures 76
6.1 General 76
6.2 Visual inspections with the machine stopped 76
6.2.1 Mechanical parts 76
6.2.2 Pneumatic systems 76
6.2.3 Hydraulic systems 76
6.2.4 Electrical systems 77
6.2.5 Guards 77
6.2.6 Design requirements 77
6.3 Measurements with the machine stopped 77
6.3.1 Guards 77
6.3.2 Electrical testing 77
6.4 Visual inspections with the machine running 77
6.4.1 Guards 77
6.4.2 Interlocking devices 77
6.4.3 Dissipation of stored energy 77
6.5 Measurements with the machine running 77
6.5.1 Measurement and declaration of noise emission 77
6.5.2 Temperature 78
6.6 Verification procedures 78

7 Information for use 80
7.1 Markings 80
7.2 Signals and warning signs 80
7.3 Instruction handbook 80
7.3.1 General 80
7.3.2 Requirements specific to group and secondary packaging machines 81

Annex A (normative) Noise test code for group and secondary packaging machines - grade of accuracy 2 and 3 83

Annex B (normative) Methods of safeguarding small and medium sized apertures 89

Annex C (normative) Methods of safeguarding large apertures 97

Annex D (normative) ESPE Muting 102
