ISO 6336-6:2006-08 (E)

Calculation of load capacity of spur and helical gears - Part 6: Calculation of service life under variable load

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Terms, definitions, symbols and abbreviated terms 1

4 General 1
4.1 Application factors 1
4.2 Determination of load and stress spectra 1
4.3 General calculation of service life 4
4.4 Palmgren-Miner rule 5

5.1 Basic principles 5
5.2 Calculation of stress spectra 7
5.3 Determination of pitting and bending strength values 8
5.4 Determination of safety factors 8

Annex A (normative) Determination of application factor, KA, from given load spectrum using equivalent torque, Teq 10

Annex B (informative) Guide values for application factor, KA 15

Annex C (informative) Example calculation of safety factor from given load spectrum 18
