

ISO 20776-1:2019 (E)

Susceptibility testing of infectious agents and evaluation of performance of antimicrobial susceptibility test devices — Part 1: Broth micro-dilution reference method for testing the in vitro activity of antimicrobial agents against rapidly growing aerobic bacteria involved in infectious diseases

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Test procedures
4.1	General
4.2	Medium
4.3	Antimicrobial agents
4.3.1	General
4.3.2	Preparation of stock solutions
4.3.3	Preparation of working solutions
4.3.4	Preparation of micro-dilution trays
4.3.5	Storage of micro-dilution trays
4.4	Preparation of inoculum
4.4.1	General
4.4.2	Broth culture method
4.4.3	Direct colony suspension method
4.5	Inoculation of micro-dilution trays
4.6	Incubation of micro-dilution trays
4.7	Reading results
4.8	Special test situations where the MIC result might give unreliable results
5	Quality control
Annex A	(informative) Requirements for Mueller-Hinton broth
A.1	General
A.2	Testing of non-fastidious organisms in Mueller-Hinton broth
A.2.1	General
A.2.2	Cation adjustment and content
A.2.3	Medium adjustments to reference Mueller-Hinton broth micro-dilution medium for testing certain bacterial species and other microbial agents
A.2.3.1	Streptococcus species
A.2.3.2	Sulphonamides and trimethoprim
A.2.3.3	Tigecycline
A.2.3.4	Lipoglycopeptides (dalbavancin, telavancin and oritavancin)
A.2.3.5	Cefiderocol
A.2.3.6	Oxacillin testing for Staphylococci
A.2.3.7	Daptomycin
A.2.3.8	Carbapenems
A.2.3.9	Glycopeptides
A.2.3.10	Polymyxins (Colistin)
A.2.4	Supplementary medium issues for which international standardization is lacking
A.2.4.1	General

Annex B (informative) Solvents and diluents for making stock solutions of selected antimicrobial agents

Annex C (informative) Preparation of working dilutions of antimicrobial agents for use in broth dilution susceptibility tests

Annex D (informative) Special test situations

D.1 General

D.2 Special test situations

D.2.1 Fastidious aerobic and facultative anaerobic bacterial species (e.g. *Haemophilus*)

D.2.2 Mecillinam

D.2.3 Fosfomycin
