

DIN EN 13480-3/A4:2010-10 (E)

Metallic industrial piping - Part 3: Design and calculation

Contents		Page
Foreword		3
1 Addition of Annex Q		4
Annex Q (informative) Simplified pipe stress analysis		4
Q.1 General		4
Q.2 Simplified procedure		4
Q.2.1 General		4
Q.2.2 Specification of allowable spacing of supports		4
Q.2.3 Check of elasticity		4
Q.3 Explanatory notes for Table Q.1		6
Q.4 Symbols		8
Q.5 Indices fL		8
Q.6 Explanatory notes to Q.2.2		9
Q.6.1 Specification of allowable spacing of supports		9
Q.6.1.1 General		9
Q.6.1.2 Single field supports (moments free) L2 to L4		9
Q.6.1.3 Cantilever beam, L5 and L6		10
Q.7 Conversion of the allowable lengths		10
Q.7.1 Other support conditions		10
Q.7.2 Other parameters		10
Q.8 Additional single loads		11
Q.8.1 General		11
Q.9 Explanatory note on Figure Q.2		14
Q.9.1 General		14
Q.9.2 Required pipe leg length L1, for f1 from the nomogram		16
Q.9.3 Required pipe leg length L2, for f2 from the nomogram		16
Q.9.3.1 General		16
Q.9.3.2 Required pipe leg length for f1 from the nomogram		17
Q.9.3.3 Required pipe leg length for f2 from the nomogram		17
Q.9.3.4 Required pipe leg length for f2 from the nomogram		17
Q.9.3.5 Required pipe leg length for f3 from the nomogram		18
Q.9.3.6 Required pipe leg length for f 4 from the nomogram		18
Q.9.3.7 Required pipe leg length for f1 from the nomogram		19
Q.9.3.8 Required pipe leg length for f2 from the nomogram		19
Q.9.3.9 Required pipe leg length for f3 from the nomogram		20
Q.9.3.10 Required pipe leg length for f4 from the nomogram		20
Q.9.3.11 Required pipe leg length for f5 from the nomogram		20
2 Modification to the Bibliography		20
