DIN EN 12952-2:2011-10 (E)

Water-tube boilers and auxiliary installations - Part 2: Materials for pressure parts of boilers and accessories

Contents

Page

Foreword 3

1 Scope 5

2 Normative references 5

3 General requirements 9
3.1 Selection of materials with regard to service conditions 9
3.2 Selection of materials with regard to fabrication 9
3.3 Material specification 9
3.3.1 General 9
3.3.2 European Standards 9
3.3.3 European approvals for materials 9
3.3.4 Particular material appraisals 10
3.4 Consideration of special materials properties 10
3.5 Contents of material specification 10
3.6 Compliance and inspection documentation of materials 11

4 Material for pressure parts 11
4.1 Materials covered by harmonized European product Standards for pressure purposes 11
4.1.1 Flat products, forgings, castings, tubes, fittings, flanges and valve bodies 11
4.1.2 Cast iron 11
4.1.3 Studs, bolts and nuts 11
4.1.4 Welding consumables 11
4.1.5 Requirements for plates used for heads 11
4.1.6 Requirements for non-destructive examination 12
4.1.7 Inspection documents 13
4.1.8 Marking 13
4.2 Material covered by European approvals of materials for pressure equipment - technical requirements 13
4.2.1 General 13
4.2.2 Manufacture 13
4.2.3 Heat treatment condition 13
4.2.4 Chemical composition 14
4.2.5 Mechanical and technological properties 14
4.3 Materials with particular material appraisals 17

5 Materials for non-pressure parts 18

6 Inspection documentation 19

Annex A (normative) Materials covered by European material Standards 20

Annex B (normative) Establishment of creep rupture strength values for new materials 31

Annex C (normative) Special requirements for composite tubes 32

Annex D (informative) Significant technical changes between this European Standard and the previous edition 36

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of Directive 97/23/EC 37
