

# DIN EN 13121-3:2016-10 (E)

## GRP tanks and vessels for use above ground - Part 3: Design and workmanship

---

<b>Contents</b>		<b>Page</b>
European foreword .....		8
Introduction .....		9
<b>1</b>	<b>Scope .....</b>	<b>10</b>
<b>2</b>	<b>Normative references .....</b>	<b>10</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>12</b>
<b>4</b>	<b>Symbols and abbreviations .....</b>	<b>13</b>
<b>5</b>	<b>Information and requirements to be supplied and documented .....</b>	<b>16</b>
5.1	General .....	16
5.2	Information to be obtained by the manufacturer .....	16
5.3	Information to be prepared by the manufacturer .....	17
5.4	Final documentation .....	18
<b>6</b>	<b>Material .....</b>	<b>18</b>
6.1	General .....	18
6.2	Chemical protective barrier .....	18
6.2.1	General .....	18
6.2.2	Thermoplastics linings .....	18
6.2.3	Resin based linings .....	18
6.3	Flammability .....	18
6.4	Electrical resistivity .....	19
<b>7</b>	<b>Mechanical properties .....</b>	<b>19</b>
7.1	General .....	19
7.2	Heat deflection temperature .....	19
7.3	Laminate construction .....	19
7.4	Laminate thickness .....	21
7.5	Laminate properties .....	21
7.6	Inter-laminar shear strength .....	21
7.6.1	Laminate .....	21
7.6.2	Thermoplastics linings .....	21
7.7	Peel strength of laminates .....	22
7.8	Pull-off strength of laminates and thermoplastic liner .....	22
7.9	Selection of physical properties of materials and allowable design factors .....	22
7.9.1	General .....	22
7.9.2	Basic design .....	22
7.9.3	Advanced design .....	23
7.9.4	Design factors .....	24
7.9.5	Overall design factors K and F .....	24
<b>8</b>	<b>Determination of design strain and loadings .....</b>	<b>27</b>
8.1	General .....	27
8.2	Limit design strains .....	28
8.2.1	General .....	28
8.2.2	Limit resin strain $\sigma_r$ .....	28
8.2.3	Limit strain for laminate or lamina $\sigma_{lim}$ .....	28
8.2.4	Limit test strain test .....	29

8.3	Limit design laminate loadings .....	29
8.4	Determination of the mechanical values from laminates .....	29
8.4.1	General .....	29
8.4.2	Calculation of laminate values without experimental test data .....	29
8.4.3	Laminate with experimental data .....	30
8.5	Laminate thickness .....	30
9	Design .....	30
9.1	Introduction .....	30
9.2	Determination of external loads .....	31
9.2.1	Snow loads .....	31
9.2.2	Wind loads .....	31
9.2.3	Seismic loads .....	32
9.2.4	Insulation loads .....	33
9.2.5	Loads resulting from connections .....	33
9.2.6	Agitation .....	34
9.2.7	Pressure due to inadequate venting .....	34
9.2.8	Personnel loading .....	34
9.2.9	Internal stresses in vessels and tanks due temperatures .....	34
9.3	Verification by the partial factor method .....	34
9.3.1	General .....	34
9.3.2	Dimensioning by using (A5)-factored loads .....	40
9.4	Drawings and design calculations .....	41
9.5	Design details .....	41
9.5.1	Design temperature TS .....	41
9.5.2	Pressure .....	41
10	Design analysis .....	42
10.1	Symbols and units .....	42
10.2	Vertical vessels or tanks, cylinders under loads ( $t < 0,01D$ ) .....	44
10.2.1	Circumferential loadings .....	44
10.2.2	Combined axial loading .....	45
10.3	Cylindrical shells subject to compressive loadings -- critical buckling criteria .....	46
10.3.1	General .....	46
10.3.2	Critical axial buckling load .....	46
10.3.3	Critical circumferential buckling pressure .....	47
10.3.4	Combined axial and radial compressive loadings .....	48
10.3.5	Critical buckling pressure for cylindrical shell stiffened with external or internal rings.49	
10.4	Conical shells .....	50
10.4.1	General requirements .....	50
10.4.2	Shallow conical ends .....	52
10.4.3	Conical ends subject to internal pressure .....	52
10.4.4	Conical ends subject to external pressure .....	54
10.4.5	Shell conical covers .....	56
10.5	Dished end .....	57
10.5.1	General requirements .....	57
10.5.2	Dished ends subject to internal pressure .....	58
10.5.3	Stability for dished ends subject to external pressure .....	59
10.6	Design of flat bottoms and skirts for vertical tanks and vessels .....	60
10.6.1	Definitions .....	60
10.6.2	Fully supported, flat bottom tanks .....	60
10.6.3	Vessels with flat bases subjected to pressure .....	67
10.6.4	Dished bottom and conical bottom configurations .....	67
10.7	Circumferential seams for cylindrical joints .....	77
10.7.1	General .....	77
10.7.2	Construction without thermoplastics liner .....	79
10.7.3	Construction with thermoplastics liner .....	79
10.8	Openings, branches and compensating laminate .....	79
10.8.1	General .....	79
10.8.2	Symbols .....	80

10.8.3	Compensation requirements for openings .....	80
10.8.4	Pull out load from nozzles .....	87
10.8.5	Prevention of failure in peel .....	87
10.8.6	Pad connections .....	87
10.8.7	Screwed connections .....	89
10.8.8	Access and inspecting openings .....	89
10.8.9	Gusset on branches .....	89
10.9	Flat Panels or Blind flanges .....	89
10.9.1	General .....	89
10.9.2	Symbols .....	90
10.9.3	Circular panels .....	90
10.10	Horizontal tanks and vessels .....	93
10.10.1	Types of supports .....	93
10.10.2	Symbols .....	95
10.10.3	Unit loads of the cylindrical shell .....	96
10.10.4	Unit loads on saddle position .....	103
10.10.5	Unit loads for horizontal loads at the vessel .....	109
10.11	Large diameter pipes and pipe fittings .....	110
10.11.1	General .....	110
10.11.2	Joints .....	111
10.11.3	Elbows .....	112
10.11.4	Large cut-outs and Tees .....	112
11	Bolted flange connections .....	115
11.1	General .....	115
11.2	Full face flanges design .....	121
11.2.1	General .....	121
11.2.2	Symbols .....	122
11.2.3	Pipe loads on flanges .....	124
11.2.4	Gasket load and bolt torque .....	124
11.2.5	Summary of loads .....	125
11.2.6	Total bending moment .....	125
11.2.7	Flange design .....	125
11.2.8	Flange slope .....	127
11.3	Stub flange design with backing ring .....	133
11.3.1	General .....	133
11.3.2	Loads, bending moment and design for backing ring made of steel or GRP .....	134
11.3.3	Stub flange loadings .....	135
11.3.4	Stub shear interface design .....	135
11.3.5	Stub end or flange design .....	135
11.3.6	Seating stress .....	136
11.4	Butt and strap jointed flanges at vessels or tanks .....	138
12	Supports for vessels and tanks .....	138
12.1	General .....	138
12.2	Supports and mountings for tanks and vessels .....	139
12.2.1	General considerations for supports .....	139
12.2.2	Supports for vertical vessels .....	139
13	Seismic loading .....	145
14	Design calculation for tank and vessel anchorage .....	145
14.1	General .....	145
14.2	Design for uplift .....	145
14.3	Design for anchor bolts .....	145
15	Structures and fittings .....	149
15.1	General .....	149
15.2	Internal structures and fittings .....	149
15.3	External structures and fittings .....	149
15.4	Lifting devices .....	149

16	Local load analysis .....	154
17	Quality Control .....	154
17.1	General .....	154
17.2	Works requirements .....	154
17.2.1	General .....	154
17.2.2	Raw materials storage .....	154
17.2.3	Manufacturing area .....	154
17.2.4	Conditions for laminating .....	154
17.3	Documentation to be prepared by the manufacturer .....	155
17.3.1	Technical documentation .....	155
17.3.2	Records and documentation requirements for raw materials .....	155
17.3.3	Manufacturing documentation requirements .....	156
17.3.4	Quality control documentation requirements .....	156
17.4	Manufacture .....	161
17.4.1	General .....	161
17.4.2	Fabrication of thermoplastics liners .....	162
17.4.3	Fabrication of laminates .....	162
17.4.4	Imperfections in laminates .....	163
17.4.5	Curing .....	163
17.5	Inspection and testing after completion of fabrication .....	163
17.5.1	Visual and dimensional inspection .....	163
17.5.2	Physical test to be carried out .....	164
17.5.3	Coupon testing .....	164
17.6	Experimental Design Verification Method for pressure vessel .....	165
17.6.1	General .....	165
17.6.2	Manufacture of the prototype vessel .....	165
17.6.3	Tests to be applied to prototype vessels .....	166
18	Marking .....	166
Annex A (informative) Product testing for serial or batch production process .....		168
A.1	Initial type testing (ITT) .....	168
A.2	Testing of samples .....	168
A.2.1	General .....	168
A.2.2	Batch release tests (BRT) .....	168
A.2.3	Process control tests .....	169
A.3	Inspection and test records .....	170
A.3.1	General .....	170
A.3.2	Marking .....	170
A.3.3	Delivery, installation, maintenance .....	170
Annex B (informative) Derivation of laminate properties from laminate properties .....		171
B.1	General .....	171
B.2	Lamina/laminate thickness .....	171
B.3	Laminate modulus .....	172
B.4	Determination of laminate flexural stiffness .....	173
B.5	Determination of laminate strains from load resultants .....	173
Annex C (normative) Pressure and leak testing .....		175
C.1	General .....	175
C.2	Open top tanks .....	175
C.3	Static head test of closed tanks and vessels .....	176
C.3.1	having a specific gravity up to 1,0 .....	176
C.3.2	having a specific gravity greater than 1,0 .....	176
C.4	Hydraulic pressure test .....	176
C.4.1	Test done in the working attitude .....	176

C.4.2	Tests done in other than the working attitudes .....	176
C.4.3	Pneumatic testing .....	177
C.4.4	Vacuum test .....	177
<b>Annex D (normative) Methods of tests .....</b>		<b>178</b>
D.1	General .....	178
D.1.1	Tests .....	178
D.1.2	Accuracy of test equipment .....	178
D.2	Loss on ignition .....	179
D.3	Tensile strength of thermoplastics welds .....	179
D.4	Bend test for thermoplastics welds .....	179
D.4.1	Introduction .....	179
D.4.2	Test arrangement .....	179
D.4.3	Test pieces .....	180
D.4.4	Method of test .....	180
D.4.5	Requirements from flexural test .....	180
D.4.6	Test report .....	180
D.5	Ultimate tensile unit strength of laminates .....	181
D.5.1	Test pieces and procedure .....	181
D.5.2	Simple laminates .....	181
D.5.3	Combined laminates .....	181
D.6	Unit tensile modulus of laminates .....	182
D.7	Inter laminar shear strength of laminates .....	184
D.7.1	Form of test specimen .....	184
D.7.2	Number of test specimens .....	184
D.7.3	Procedure .....	184
D.7.4	Results .....	184
D.7.5	Report .....	184
D.8	Lap shear strength of bond between thermoplastics lining and laminate or between laminates .....	185
D.8.1	Form of the test specimen .....	185
D.8.2	Number of test specimens .....	185
D.8.3	Procedure .....	185
D.8.4	Report .....	186
D.9	Peel strength of bond between laminate layers .....	186
D.9.1	Form of the specimen .....	186
D.9.2	Number of specimens .....	186
D.9.3	Procedure .....	187
D.9.4	Report .....	187
D.10	Flexural short-term creep test (flexural modulus E1h and E24h test) .....	189
D.10.1	General .....	189
D.10.2	Definitions .....	189
D.10.3	Test device .....	189
D.10.4	Test pieces .....	190
D.10.5	Procedure .....	190
D.10.6	Calculation .....	190
D.11	Barcol hardness .....	191
D.12	Determination of electrical resistivity .....	191
D.13	Glass transition temperature by DSC of cured resin .....	191
D.14	Spark testing of thermoplastics welds .....	191
D.14.1	General .....	191
D.14.2	Apparatus .....	192
D.14.3	Procedure .....	192
D.15	Long term flexural creep test .....	192
D.15.1	General .....	192
D.15.2	Definitions .....	192
D.15.3	Test device .....	192
D.15.4	Test pieces .....	193
D.15.5	Procedure .....	193

D.15.6	Calculation .....	193
D.16	Hardness of rubber .....	194
D.17	Flash point test .....	194
D.18	Heat deflection temperature test .....	194
D.19	Flexural strength of laminate .....	194
D.20	Pull-off strength from laminates .....	194
<b>Annex E (normative) Approval testing of laminators .....</b>		<b>196</b>
E.1	General .....	196
E.2	Assessment of the laminator .....	196
E.3	Procedure .....	196
E.4	Theory exam .....	197
E.5	Test pieces .....	197
E.6	Evaluation of test pieces .....	197
E.6.1	General .....	197
E.6.2	Test procedure 1 .....	198
E.6.3	Test procedure 2 .....	198
E.6.4	Test procedure 3 .....	198
E.7	Minimum requirements for acceptance .....	198
E.8	Test certificate .....	199
E.9	Validity and renewal .....	199
E.10	Range of approval .....	199
<b>Annex F (informative) Design by stress analysis .....</b>		<b>201</b>
F.1	General .....	201
F.2	Typical methods .....	201
F.3	General requirements .....	201
F.4	Important determination results .....	201
F.5	Design factors .....	201
<b>Annex G (normative) Environmental aspects .....</b>		<b>202</b>
G.1	Principle .....	202
G.2	Design and Manufacturing .....	202
G.3	Effects of materials on water .....	202
G.4	Effects of materials on food .....	203
G.5	Recycling .....	203
G.6	Storage of substances hazardous to water .....	203
<b>Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2014/68/EU aimed to be covered .....</b>		<b>204</b>
<b>Bibliography .....</b>		<b>206</b>
