DIN EN 13480-8:2024-12 (E)

Metallic industrial piping - Part 8: Additional requirements for aluminium and aluminium alloy piping

Contents

Page

European foreword 4

1 Scope 6

2 Normative references 6

3 Terms, definitions, symbols and units 8

4 General requirements 8

5 Materials 8
5.1 General 8
5.2 Material grouping system 9
5.3 Elongation after fracture 9
5.4 Chemical composition 10
5.5 Lamellar tearing 10
5.6 Design temperature and properties 10
5.7 Prevention of brittle fracture 10
5.8 Specific requirements for fasteners made of aluminium and aluminium alloys 11
5.9 Lined piping 11
5.10 Clad products 11
5.11 Technical delivery conditions for welding consumables 11

6 Design 11
6.1 General 11
6.2 Time-independent nominal design stress 11
6.3 Straight pipes 12
6.4 Pipe bends and elbows 12
6.5 Mitre bends 12
6.6 Socket welds 13
6.7 Designing with transition joints 14
6.7.1 Design considerations 14
6.7.2 Location of transition joints 14
6.7.3 Requirements for transition joints 14
6.8 Port-hole extruded tubes 14
6.9 Alternative methods 14

7 Fabrication and installation 14
7.1 General 14
7.2 Material grouping 15
7.3 Tolerances 15
7.3.1 Welded pipes and connection dimensions of pipe fittings 15
7.3.2 Welded piping construction 15
7.4 Cutting and bevelling 15
7.5 Bending and other forming 16
7.5.1 General 16
7.5.2 Definition of cold- and hot forming 16
7.5.3 Heat treatment after cold forming 16
7.5.4 Heat treatment after hot forming 17
7.6 Welding 18
7.6.1 Welding personnel 18

7.6.2 Welding processes ... 18
7.6.3 Weld joint preparation ... 18
7.6.4 Preheating ... 19
7.6.5 Backing rings and backing strips ... 20
7.6.6 Post-weld heat treatment (PWHT) ... 20

8 Inspection and testing ... 20
8.1 General ... 20
8.2 Formed pressure retaining parts ... 20
8.2.1 General ... 20
8.2.2 Testing of formed parts ... 21
8.2.3 Destructive testing of formed and heat treated parts ... 21
8.3 Welding ... 22
8.4 Visual and non-destructive testing of welds ... 22
8.4.1 Application of NDT ... 22
8.4.2 Circumferential, branch, socket and seal welds ... 22
8.4.3 Longitudinal welds and spiral welded tubes/pipes ... 22
8.5 VT and NDT Methods ... 23
8.6 Production test plates for welded pipes ... 24

9 Final assessment and documentation ... 25
9.1 General ... 25
9.2 Pneumatic pressure test ... 25
9.3 Documentation for components ... 25

Annex A (informative) Dimensional tolerances ... 27

Annex B (normative) Transition joints ... 29

Annex C (normative) Nominal design stress values ... 34

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2014/68/EU aimed to be covered ... 42
