DIN EN 13923:2006-02 (E)

Filament-wound FRP pressure vessels - Materials, design, manufacturing and testing

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and abbreviated terms 7

5 General 8

6 Materials 8
6.1 General 8
6.2 Raw materials 8
6.3 Chemical resistance 9
6.4 Characteristics values for calculations 9

7 Design 11
7.1 General 11
7.2 The design factor 11
7.3 Permissible strain 13
7.4 Stress resultants 14

8 Design analysis method A 16
8.1 General 16
8.2 Calculations 16
8.3 Prototype testing 17

9 Design analysis method B 18
9.1 Calculation 18

10 Design documentation 20

11 Manufacturing 20
11.1 Filament winding 20
11.2 Protective layers 21
11.3 Manufacturing specifications 22

12 Final acceptance testing 22
12.1 General 22
12.2 Acceptance testing for filament wound vessels 22
12.3 Hydrostatic pressure test 23
12.4 Test report 24

Annex A (normative) Fabrication of flat filament wound test specimens 25

Annex B (informative) Laminate Theory 27

Annex C (normative) Extrapolation method for long term behaviour 34

Annex D (informative) Calculation example 37

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 97/23/EC 40

Bibliography 41
