DIN EN 13480-8:2007-06 (E)

Metallic industrial piping - Part 8: Additional requirements for aluminium and aluminium alloy piping

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms, definitions, symbols and units 6

4 General requirements 6

5 Materials 7
5.1 General 7
5.2 Material grouping system 7
5.3 Elongation after fracture 8
5.4 Chemical composition 8
5.5 Lamellar tearing 8
5.6 Design temperature and properties 8
5.7 Prevention of brittle fracture 9
5.8 Specific requirements for fasteners made of aluminium and aluminium alloys 9
5.9 Lined piping 9
5.10 Clad products 9
5.11 Technical delivery conditions for welding consumables 9

6 Design 9
6.1 General 9
6.2 Time-independent nominal design stress 9
6.3 Straight pipes 10
6.4 Pipe bends and elbows 10
6.5 Mitre bends 10
6.6 Socket welds 12
6.7 Designing with transition joints 13

7 Fabrication and installation 13
7.1 General 13
7.2 Material grouping 13
7.3 Tolerances 13
7.4 Cutting and bevelling 14
7.5 Bending and other forming 14
7.6 Welding 17

8 Inspection and testing 19
8.1 General 19
8.2 Formed pressure retaining parts 19
8.3 Welding 21
8.4 Visual and non-destructive testing of welds 21
8.5 VT and NDT Methods 22
8.6 Production test plates for welded pipes 23

9 Final assessment and documentation 24
9.1 General 24
9.2 Pneumatic pressure test 24

9.3 Documentation for components 25

Annex A (informative) Dimensional tolerances 27

Annex B (normative) Transition joints 29

B.1 General 29
B.2 Materials 29
B.3 Design 29
B.4 Permanent joining process 29

Issue 1 (2007-03) B.5 Testing 30
B.6 Marking 30
B.7 Documentation 31
B.8 Protection against overheating 31

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 97/23/EC 33

Bibliography 35
