ISO 21439:2009-02 (E)

Clinical dosimetry - Beta radiation sources for brachytherapy

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Beta radiation sources and source data 8
4.1 Ophthalmic and dural brachytherapy sources 8
4.2 Intravascular brachytherapy sources 9
4.3 Characteristics of radionuclides 9
4.4 Source specification 9

5 Dose calculation parameters and formalisms 11
5.1 General 11
5.2 Radiation-field parameterization 12
5.3 Radial dose profile 13
5.4 Normalization of relative-dose data for seed sources 14
5.5 Adaptation of the TG-43/60 formalism for a long beta radiation line source 16
5.6 Reference data sets 17
5.7 Parameters for source uniformity characterization 17

6 Calibration and traceability 19
6.1 Measurand 19
6.2 Traceability 19
6.3 Reference point 19
6.4 Primary standards 19
6.5 Secondary standards 19
6.6 Transfer standards 19
6.7 Calibration of therapeutic beta radiation sources 20

7 Dose measurements in-phantom and measurement corrections 20
7.1 Measurements in water or a water-equivalent phantom 20
7.2 Detectors for beta radiation 21
7.3 Conversion of absorbed dose in solid phantoms to absorbed dose to water 22
7.4 Effective point of measurement in the detector 24

8 Theoretical modelling 25
8.1 Point-dose kernels 25
8.2 Monte Carlo simulation 26

9 Uncertainties in source calibrations 28
9.1 General 28
9.2 Uncertainty of primary standards 28
9.3 Uncertainty of secondary standards 28
9.4 Uncertainty of transfer standards 28
9.5 Relationship of dosimetry uncertainty to positional error 29
9.6 Uncertainty in theoretical modeling 29

10 Treatment planning and reporting 30
10.1 General 30
10.2 General aspects of treatment planning 30
10.3 Documentation in ophthalmic brachytherapy 30
10.4 Uncertainty of the dose delivered in ophthalmic brachytherapy 30
10.5 Documentation in intravascular brachytherapy 31
10.6 Reporting uncertainties in intravascular brachytherapy 33
11 Clinical quality control 33
11.1 Acceptance tests 33
11.2 Constancy checks 37

Annex A (normative) Reference data 38

Annex B (informative) Reference data sheet examples 43

Annex C (informative) Primary standards for beta radiation dosimetry 52

Annex D (informative) Detectors and phantom materials for clinical dosimetry of beta radiation brachytherapy sources 58

Annex E (informative) Monte Carlo calculations 68

Annex F (informative) Treatment planning 77

Bibliography 82
