## Clinical dosimetry - Beta radiation sources for brachytherapy

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Beta radiation sources and source data .....	8
4.1	Ophthalmic and dural brachytherapy sources .....	8
4.2	Intravascular brachytherapy sources .....	9
4.3	Characteristics of radionuclides .....	9
4.4	Source specification .....	9
5	Dose calculation parameters and formalisms .....	11
5.1	General .....	11
5.2	Radiation-field parameterization .....	12
5.3	Radial dose profile .....	13
5.4	Normalization of relative-dose data for seed sources .....	14
5.5	Adaptation of the TG-43/60 formalism for a long beta radiation line source .....	16
5.6	Reference data sets .....	17
5.7	Parameters for source uniformity characterization .....	17
6	Calibration and traceability .....	19
6.1	Measurand .....	19
6.2	Traceability .....	19
6.3	Reference point .....	19
6.4	Primary standards .....	19
6.5	Secondary standards .....	19
6.6	Transfer standards .....	19
6.7	Calibration of therapeutic beta radiation sources .....	20
7	Dose measurements in-phantom and measurement corrections .....	20
7.1	Measurements in water or a water-equivalent phantom .....	20
7.2	Detectors for beta radiation .....	21
7.3	Conversion of absorbed dose in solid phantoms to absorbed dose to water .....	22
7.4	Effective point of measurement in the detector .....	24
8	Theoretical modelling .....	25
8.1	Point-dose kernels .....	25
8.2	Monte Carlo simulation .....	26
9	Uncertainties in source calibrations .....	28
9.1	General .....	28
9.2	Uncertainty of primary standards .....	28
9.3	Uncertainty of secondary standards .....	28
9.4	Uncertainty of transfer standards .....	28
9.5	Relationship of dosimetry uncertainty to positional error .....	29
9.6	Uncertainty in theoretical modeling .....	29

10	Treatment planning and reporting .....	30
10.1	General .....	30
10.2	General aspects of treatment planning .....	30
10.3	Documentation in ophthalmic brachytherapy .....	30
10.4	Uncertainty of the dose delivered in ophthalmic brachytherapy .....	30
10.5	Documentation in intravascular brachytherapy .....	31
10.6	Reporting uncertainties in intravascular brachytherapy .....	33
11	Clinical quality control .....	33
11.1	Acceptance tests .....	33
11.2	Constancy checks .....	37
Annex A (normative) Reference data .....		38
Annex B (informative) Reference data sheet examples .....		43
Annex C (informative) Primary standards for beta radiation dosimetry .....		52
Annex D (informative) Detectors and phantom materials for clinical dosimetry of beta radiation brachytherapy sources .....		58
Annex E (informative) Monte Carlo calculations .....		68
Annex F (informative) Treatment planning .....		77
Bibliography .....		82
