Clinical dosimetry - Beta radiation sources for brachytherapy

| Contents | | Page |
|--------------------|--|-------------|
| Foreword | | v |
| Introduction | | vi |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 2 |
| 4 | Beta radiation sources and source data | 8 |
| 4.1 | Ophthalmic and dural brachytherapy sources | 8 |
| 4.2 | Intravascular brachytherapy sources | 9 |
| 4.3 | Characteristics of radionuclides | 9 |
| 4.4 | Source specification | 9 |
| 5 | Dose calculation parameters and formalisms | 11 |
| 5.1 | General | 11 |
| 5.2 | Radiation-field parameterization | 12 |
| 5.3 | Radial dose profile | 13 |
| 5.4 | Normalization of relative-dose data for seed sources | 14 |
| 5.5 | Adaptation of the TG-43/60 formalism for a long beta radiation line source | 16 |
| 5.6 | Reference data sets | 17 |
| 5.7 | Parameters for source uniformity characterization | 17 |
| 6 | Calibration and traceability | 19 |
| 6.1 | Measurand | 19 |
| 6.2 | Traceability | 19 |
| 6.3 | Reference point | 19 |
| 6.4 | Primary standards | 19 |
| 6.5 | Secondary standards | 19 |
| 6.6 | Transfer standards | 19 |
| 6.7 | Calibration of therapeutic beta radiation sources | 20 |
| 7 | Dose measurements in-phantom and measurement corrections | 20 |
| 7.1 | Measurements in water or a water-equivalent phantom | 20 |
| 7.2 | Detectors for beta radiation | 21 |
| 7.3 | Conversion of absorbed dose in solid phantoms to absorbed dose to water | 22 |
| 7.4 | Effective point of measurement in the detector | 24 |
| 8 | Theoretical modelling | 25 |
| 8.1 | Point-dose kernels | 25 |
| 8.2 | Monte Carlo simulation | 26 |
| 9 | Uncertainties in source calibrations | 28 |
| 9.1 | General | 28 |
| 9.2 | Uncertainty of primary standards | 28 |
| 9.3 | Uncertainty of secondary standards | 28 |
| 9.4 | Uncertainty of transfer standards | 28 |
| 9.5 | Relationship of dosimetry uncertainty to positional error | 29 |
| 9.6 | Uncertainty in theoretical modeling | 29 |

| | | |
|---|---|----|
| 10 | Treatment planning and reporting | 30 |
| 10.1 | General | 30 |
| 10.2 | General aspects of treatment planning | 30 |
| 10.3 | Documentation in ophthalmic brachytherapy | 30 |
| 10.4 | Uncertainty of the dose delivered in ophthalmic brachytherapy | 30 |
| 10.5 | Documentation in intravascular brachytherapy | 31 |
| 10.6 | Reporting uncertainties in intravascular brachytherapy | 33 |
| 11 | Clinical quality control | 33 |
| 11.1 | Acceptance tests | 33 |
| 11.2 | Constancy checks | 37 |
| Annex A (normative) Reference data | | 38 |
| Annex B (informative) Reference data sheet examples | | 43 |
| Annex C (informative) Primary standards for beta radiation dosimetry | | 52 |
| Annex D (informative) Detectors and phantom materials for clinical dosimetry of beta radiation brachytherapy sources | | 58 |
| Annex E (informative) Monte Carlo calculations | | 68 |
| Annex F (informative) Treatment planning | | 77 |
| Bibliography | | 82 |
