

# DIN EN ISO 19238:2020-05 (E)

## Radiological protection - Performance criteria for service laboratories performing biological dosimetry by cytogenetics (ISO 19238:2014)

---

Contents	Page
European foreword.....	4
Foreword.....	5
Introduction.....	6
1 Scope .....	7
2 Terms and definitions.....	7
3 Dicentric assay.....	9
4 Responsibility of the customer.....	9
5 Responsibility of the service laboratory.....	10
5.1 Setup and sustainment of the QA program.....	10
5.2 Responsibility during service.....	10
6 Confidentiality of personal information.....	11
6.1 Overview .....	11
6.2 Applications of the principle of confidentiality .....	11
7 Laboratory safety requirements.....	12
7.1 Overview .....	12
7.2 Microbiological safety requirements .....	12
7.3 Chemical safety.....	12
7.4 Optical safety requirements .....	14
7.5 Safety plan.....	14
8 Calibration curve(s) .....	15
8.1 Culturing.....	15
8.2 Calibration source(s) .....	16
8.3 Establishment of calibration curve(s) .....	16
8.4 Minimum resolvable dose measurement.....	17
9 Scoring unstable chromosome aberrations.....	17
9.1 Procedure for scoring first-division metaphases.....	17
9.2 Criteria for scoring.....	17
10 Criteria for converting a measured aberration frequency into an estimate of absorbed dose.....	18
10.1 Overview .....	18
10.2 Comparison with controls.....	18
10.3 Testing the distribution of aberrations per cell.....	18
10.4 Determination of estimated whole-body dose and confidence limits .....	18
10.5 Acute and non-acute exposure cases .....	19
10.6 Partial-body and prior-exposure cases.....	19
11 Reporting of results.....	21
11.1 General.....	21
11.2 Content of the report (see <a href="#">Annex C</a> for a standard form) .....	21
11.3 Interpretation of the results .....	22
12 Quality assurance and quality control.....	22
12.1 Overview .....	22
12.2 Specific requirements .....	23

<b>Annex A</b> (informative) Sample instructions for customer .....	<b>25</b>
<b>Annex B</b> (informative) Sample questionnaire .....	<b>26</b>
<b>Annex C</b> (informative) Sample of report .....	<b>28</b>
<b>Annex D</b> (informative) Fitting of the low-LET dose-response curve by the method of maximum likelihood and calculating the error of dose estimate .....	<b>29</b>
<b>Annex E</b> (informative) Odds ratio method for cases of suspected exposure to a low dose .....	<b>32</b>
<b>Annex F</b> (informative) Sample data sheet for recording aberrations .....	<b>33</b>
<b>Bibliography</b> .....	<b>34</b>
