

# DIN EN ISO 20046:2021-04 (E)

## Radiological protection - Performance criteria for laboratories using Fluorescence In Situ Hybridization (FISH) translocation assay for assessment of exposure to ionizing radiation (ISO 20046:2019)

---

<b>Contents</b>		<b>Page</b>
<b>European foreword</b>		<b>4</b>
<b>Foreword</b>		<b>5</b>
<b>Introduction</b>		<b>6</b>
<b>1 Scope</b>		<b>7</b>
<b>2 Normative references</b>		<b>7</b>
<b>3 Terms and definitions</b>		<b>7</b>
<b>4 Translocation assay by FISH</b>		<b>11</b>
4.1 General		11
4.2 Culturing and fixation		11
4.3 Types of staining		11
4.4 Scoring		12
4.5 General requirement of the laboratory		12
<b>5 Responsibility of the customer</b>		<b>12</b>
<b>6 Responsibility of the laboratory</b>		<b>13</b>
6.1 Setup and sustainment of the QA program		13
6.2 Responsibility during service		13
<b>7 Confidentiality of personal information</b>		<b>14</b>
7.1 Overview		14
7.2 Applications of the principle of confidentiality		14
7.2.1 Delegation of responsibilities within the laboratory		14
7.2.2 Requests for analysis		15
7.2.3 Transmission of confidential information		15
7.2.4 Anonymity of samples		15
7.2.5 Reporting of results		15
7.2.6 Storage of data and results		15
<b>8 Laboratory safety requirements</b>		<b>15</b>
8.1 Overview		15
8.2 Microbiological safety requirements		16
8.3 Chemical safety requirements		16
8.4 Optical safety requirements		17
8.5 Safety plan		17
<b>9 Sample processing</b>		<b>17</b>
9.1 Culturing and staining		17
9.2 Scoring		18
9.2.1 Criteria for scoring		18
9.2.2 Conversion of translocation frequencies to genome equivalence		18
<b>10 Background levels of translocations</b>		<b>19</b>
<b>11 Calibration curves</b>		<b>20</b>
11.1 Calibration source(s)		20
11.2 Establishment of calibration curve(s)		20

<b>12</b>	<b>Criteria for converting a measured aberration frequency into an estimate of absorbed dose</b> .....	<b>22</b>
12.1	Determination of estimated whole-body absorbed dose and confidence limits .....	22
12.1.1	General.....	22
12.1.2	Comparison with the background level: Characterisation of the minimum detectable dose.....	22
12.1.3	Confidence limits on the number of translocations .....	25
12.1.4	Adjustment for background yield .....	26
12.1.5	Calculation of absorbed dose.....	27
12.1.6	Calculation of uncertainty on absorbed dose .....	28
12.1.7	Acute and non-acute exposure cases.....	28
12.1.8	Other exposure scenarios .....	29
<b>13</b>	<b>Reporting of results</b> .....	<b>29</b>
13.1	General.....	29
13.2	Content of the report (see <a href="#">Annex C</a> for an example of a standard form).....	29
13.3	Interpretation of the results.....	30
<b>14</b>	<b>Quality assurance and quality control</b> .....	<b>30</b>
14.1	Overview .....	30
14.2	Specific requirements .....	30
14.2.1	General.....	30
14.2.2	Performance checks by inter-laboratory comparisons.....	30
14.2.3	Performance check of scorer qualification.....	31
14.2.4	Performance checks of sample transport integrity .....	31
14.2.5	Performance checks of sample integrity by service laboratory.....	32
14.2.6	Performance checks of instrumentation.....	32
14.2.7	Performance checks of sample protocol .....	32
14.2.8	Performance checks of sample scoring.....	32
14.2.9	Performance checks of result report generation .....	32
	<b>Annex A (informative) Sample instructions for customer</b> .....	<b>33</b>
	<b>Annex B (informative) Sample questionnaire</b> .....	<b>35</b>
	<b>Annex C (informative) Sample of report</b> .....	<b>37</b>
	<b>Annex D (informative) Sample data sheets for recording painted aberrations</b> .....	<b>38</b>
	<b>Annex E (informative) Fitting of the dose response-curve by the method of maximum likelihood and calculating the uncertainty of the absorbed dose estimate</b> .....	<b>40</b>
	<b>Annex F (informative) Process for dose estimation</b> .....	<b>41</b>
	<b>Bibliography</b> .....	<b>46</b>
