National foreword 4

National Annex NA (informative) Bibliography 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 General requirements 8
4.1 Storage and handling conditions 8
4.2 Safelights 8
4.3 X-ray equipment 9
4.4 Air kerma meter 9
4.5 Processing 9
4.6 Densitometry 10

5 Determination of sensitometric curve shape 10
5.1 General 10
5.2 Beam qualities 11
5.3 Geometry for curve shape determination 11
5.4 Exposure 14
5.5 Evaluation 14

6 Determination of average gradient 14

7 Determination of speed 16
7.1 Definition 16
7.2 Beam qualities 16
7.2.1 General 16
7.2.2 Phantom for Technique I 16
7.2.3 Phantom for Technique II 16
7.2.4 Phantom for Technique III 17
7.2.5 Phantom for Technique IV 17
7.2.6 Establishment of X-ray tube voltage 17
7.3 Geometry 19
7.4 Exposure 19
7.5 Evaluation 19

8 Speed and average gradient determination without sensitometric curve 22

9 Uncertainty 22

10 Test report 23

Annex A (informative) Rationale 24

A.1 Sensitometric curve shape 24
A.2 Speed 24
A.3 Phantoms 24
A.4 Air kerma 25
A.5 Dependence of speed on beam quality 25

Bibliography 26
