

# ISO 80601-2-13:2022-04 (E)

## Medical electrical equipment - Part 2-13 : Particular requirements for basic safety and essential performance of an anaesthetic workstation

---

| Contents                                                                                                                                                     | Page |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Foreword .....                                                                                                                                               | v    |
| Introduction.....                                                                                                                                            | vii  |
| 201.1 Scope, object and related standards.....                                                                                                               | 1    |
| 201.2 Normative references .....                                                                                                                             | 3    |
| 201.3 Terms and definitions .....                                                                                                                            | 4    |
| 201.4 General requirements .....                                                                                                                             | 10   |
| 201.5 General requirements for testing <i>ME equipment</i> .....                                                                                             | 11   |
| 201.6 Classification of <i>ME equipment</i> or <i>ME systems</i> .....                                                                                       | 12   |
| 201.7 <i>ME equipment</i> identification, marking and documents .....                                                                                        | 12   |
| 201.8 Protection against electrical <i>hazards</i> from <i>ME equipment</i> .....                                                                            | 17   |
| 201.9 Protection against <i>mechanical hazards</i> of <i>ME equipment</i> and <i>ME systems</i> .....                                                        | 18   |
| 201.10 Protection against unwanted and excessive radiation <i>hazards</i> .....                                                                              | 19   |
| 201.11 Protection against excessive temperatures and other <i>hazards</i> .....                                                                              | 19   |
| 201.12 Accuracy of controls and instruments and protection against hazardous outputs .....                                                                   | 22   |
| 201.13 <i>Hazardous situations</i> and fault conditions.....                                                                                                 | 28   |
| 201.14 <i>Programmable electrical medical systems (PEMS)</i> .....                                                                                           | 28   |
| 201.15 Construction of <i>ME equipment</i> .....                                                                                                             | 29   |
| 201.16 <i>ME systems</i> .....                                                                                                                               | 29   |
| 201.17 Electromagnetic compatibility of <i>ME equipment</i> and <i>ME systems</i> .....                                                                      | 31   |
| 201.101 Additional requirements for <i>anaesthetic gas delivery systems</i> .....                                                                            | 31   |
| 201.102 Additional requirements for an <i>anaesthetic breathing system</i> .....                                                                             | 37   |
| 201.103 Additional requirements for an <i>AGSS</i> .....                                                                                                     | 48   |
| 201.104 Additional requirements for interchangeable and non-interchangeable<br><i>anaesthetic vapour delivery systems</i> .....                              | 53   |
| 201.105 Additional requirements for an <i>anaesthetic ventilator</i> .....                                                                                   | 58   |
| 201.106 Display of pressure-volume loops .....                                                                                                               | 64   |
| 201.107 Clinical evaluation .....                                                                                                                            | 64   |
| 202 Electromagnetic disturbances — Requirements and tests .....                                                                                              | 65   |
| 203 General requirements for radiation protection in diagnostic X-ray equipment.....                                                                         | 65   |
| 206 <i>Usability</i> .....                                                                                                                                   | 65   |
| 208 General requirements, tests and guidance for <i>alarm systems</i> in <i>medical electrical<br/>equipment</i> and <i>medical electrical systems</i> ..... | 66   |
| 209 Requirements for environmentally conscious design .....                                                                                                  | 66   |

|                               |                                                                                                                                                                |            |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>210</b>                    | <b><i>Process requirements for the development of physiologic closed-loop controllers.....</i></b>                                                             | <b>67</b>  |
| <b>211</b>                    | <b><i>Requirements for medical electrical equipment and medical electrical systems used in the home healthcare environment .....</i></b>                       | <b>67</b>  |
| <b>212</b>                    | <b><i>Requirements for medical electrical equipment and medical electrical systems intended for use in the emergency medical services environment.....</i></b> | <b>67</b>  |
| <b>Annex C (informative)</b>  | <b><i>Guide to marking and labelling requirements for ME equipment and ME systems or their parts .....</i></b>                                                 | <b>68</b>  |
| <b>Annex D (informative)</b>  | <b><i>Symbols on marking .....</i></b>                                                                                                                         | <b>78</b>  |
| <b>Annex AA (informative)</b> | <b><i>Particular guidance and rationale .....</i></b>                                                                                                          | <b>80</b>  |
| <b>Annex BB (normative)</b>   | <b><i>Test for flammability of anaesthetic agent.....</i></b>                                                                                                  | <b>97</b>  |
| <b>Annex CC (informative)</b> | <b><i>Terminology — alphabetized index of defined terms.....</i></b>                                                                                           | <b>98</b>  |
