## Anaesthetic and respiratory equipment - Air entrainment devices

---

| <b>Contents</b>                                                          | <b>Page</b> |
|--------------------------------------------------------------------------|-------------|
| Foreword .....                                                           | iv          |
| Introduction .....                                                       | v           |
| 1 Scope .....                                                            | 1           |
| 2 Normative references .....                                             | 1           |
| 3 Terms and definitions .....                                            | 1           |
| 4 General requirements .....                                             | 2           |
| 5 Materials .....                                                        | 2           |
| 5.1 General .....                                                        | 2           |
| 5.2 Biocompatibility of breathing gas pathways .....                     | 2           |
| 6 Design requirements .....                                              | 2           |
| 6.1 General .....                                                        | 2           |
| 6.2 Oxygen inlet connectors .....                                        | 3           |
| 6.3 Outlet connectors .....                                              | 3           |
| 6.4 Air inlet attachments .....                                          | 3           |
| 7 Information to be provided by the manufacturer .....                   | 3           |
| 7.1 General .....                                                        | 3           |
| 7.2 Marking .....                                                        | 3           |
| 7.3 Instructions for use .....                                           | 4           |
| Annex A (normative) Test method for delivered oxygen concentration ..... | 5           |
| Bibliography .....                                                       | 8           |
