DIN EN ISO 17657-4:2007-09 (E)

Resistance welding - Welding current measurement for resistance welding - Part 4: Calibration system (ISO 17657-4:2005)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Construction of calibration system 6
4.1 Reference welding current measuring system 6
4.2 Test set-up 6
4.3 Basic feature for calibration of welding current measuring system 6
4.4 Basic feature for calibration of current sensor 8
4.5 Basic feature for calibration of welding current meter without sensor 9

5 Physical environment and operating conditions 10

6 Calibration requirements 10
6.1 Reference welding current measuring system 10
6.2 Reference current sensor 10
6.3 Data acquisition device 11
6.4 Test stage and power sources 11

7 Test report 11
7.1 Test report for calibration of welding current measuring systems 11
7.2 Test report for calibration of current sensors 12
7.3 Test report for calibration of welding current meters without sensors 12

8 Test procedure 13
8.1 General 13
8.2 Calibration of welding current measuring system 13
8.3 Calibration of current sensor 14
8.4 Calibration of welding current meter without sensor 14
8.5 Special calibration cases 14

Annex A (informative) Measuring set-up 16

Annex B (informative) Items to be recorded or filed as reference documentation for calibration 21

Annex C (informative) Examples of the test report in accordance with this part of ISO 17657 23
