DIN EN ISO 16433:2007-09 (E)

Resistance welding - Procedure for seam welding of uncoated and coated low carbon steels (ISO 16433:2006)

Contents

Page

Foreword ... 4

Introduction ... 5

1 Scope ... 6

2 Normative references ... 6

3 Terms and definitions ... 7

4 Materials ... 7
4.1 Form ... 7
4.2 Steel grades ... 7
4.3 Surface conditions ... 7

5 Component design and manufacture ... 8
5.1 Component design ... 8
5.2 Component manufacture ... 8

6 Process requirements ... 8
6.1 Seam welding with wide wheels ... 8
6.2 Seam welding with thin wheels ... 8
6.3 Mash seam welding ... 9
6.4 Wire seam welding ... 9
6.5 Wide-electrode seam welding ... 9
6.6 Foil seam welding ... 9

7 Welding equipment ... 10
7.1 Welding machine ... 10
7.2 Electrodes (wheels, mandrels, pads, backing bars) ... 10
7.2.1 Electrode materials ... 10
7.2.2 Electrode dimensions ... 10
7.3 Electrode-wheel cooling ... 12

8 Weldability assessment ... 12

9 Weld assessment — Type tests ... 13
9.1 Test pieces ... 13
9.1.1 General ... 13
9.1.2 Manual peel test piece ... 13
9.1.3 Mechanised peel test piece ... 13
9.1.4 Pressure test ... 14
9.1.5 Metallurgical examination ... 14
9.2 Test requirements ... 14
9.2.1 Weld dimensions ... 14
9.2.2 Manual peel test ... 14
9.2.3 Mechanised peel test ... 14
9.2.4 Pressure test ... 14
9.2.5 Visual and metallurgical examination ... 14
9.3 Acceptance requirements ... 15

10 Weld assessment — routine tests ... 15
10.1 General ... 15
10.2 Batch testing ... 15
10.3 Test pieces and test procedures ... 15
10.4 Number of tests ... 15
10.5 Test requirements ... 15

11 Routine production weld quality-control requirements 16
11.1 Weld size — nugget width 16
11.2 Weld dimensions 16
11.3 Weld failure mode 17
11.4 Weld appearance – surface condition 17
11.5 Distortion 17
12 Reclamation of non-conformant assemblies 17
Annex A (informative) **Welding equipment 18**
Annex B (informative) **Typical seam welding conditions 19**
Annex C (Informative) **Partial list of steel types applicable to the standard 24**
