|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....                                  | 1           |
| 3                     | Terms and definitions .....                                 | 1           |
| 4                     | Principle .....   | 2           |
| 5                     | Equipment and materials .....                               | 2           |
| 6                     | Tests procedures .....                                      | 4           |
| 6.1                   | Welding procedure selection .....                           | 4           |
| 6.2                   | Setting up the test equipment .....                         | 4           |
| 6.3                   | Trial tests .....   | 5           |
| 6.4                   | Emission rate testing .....                                 | 5           |
| 7                     | Calculating and reporting the results .....                 | 6           |
| Annex A (informative) | Equipment notes .....                                       | 7           |
| Annex B (informative) | Welding parameters for ozone emission rate testing .....    | 9           |
| Annex C (normative)   | Test procedures .....                                       | 11          |
| Annex D (normative)   | Calculation of the average stable ozone concentration ..... | 12          |
| Annex E (normative)   | Test report .....   | 13          |
| Bibliography .....    |   | 14          |
