

DIN EN ISO 18275:2012-07 (E)

Welding consumables - Covered electrodes for manual metal arc welding of high-strength steels - Classification (ISO 18275:2011)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Classification	6
4	Symbols and requirements	7
4.1	Symbol for the product/process	7
4.2	Symbol for tensile properties of all-weld metal	7
4.3	Symbol for impact properties of all-weld metal	8
4.4	Symbol for chemical composition of all-weld metal	9
4.5	Symbol for type of electrode covering	11
4.6	Symbol for condition of post-weld heat treatment of all-weld metal	11
4.7	Symbol for nominal electrode efficiency and type of current	12
4.8	Symbol for welding position	13
4.9	Symbol for diffusible hydrogen content of deposited metal	13
4.10	Mechanical property and composition requirements	13
5	Mechanical property tests	19
5.1	General	19
5.2	Preheating and interpass temperatures	19
5.3	Pass sequence	19
6	Chemical analysis	19
7	Fillet weld test	20
8	Rounding procedure	21
9	Retests	21
10	Technical delivery conditions	22
11	Examples of designation	22
Annex A (informative) Classification systems		24
Annex B (informative) Description of types of electrode covering -- Classification by yield strength and 47 J impact energy		27
Annex C (informative) Description of types of electrode covering -- Classification by tensile strength and 27 J impact energy		28
Annex D (informative) Notes on diffusible hydrogen		30
Annex E (informative) Description of chemical composition symbols -- Classification by yield strength and 47 J impact energy		31

Annex F (informative) Description of chemical composition symbols -- Classification by tensile strength and 27 J impact energy	32
Bibliography	33
