

DIN ISO 24394:2013-12 (E)

Welding for aerospace applications - Qualification test for welders and welding operators - Fusion welding of metallic components (ISO 24394:2008 + Amd. 1:2013)

Contents		Page
National foreword		3
National Annex NA (informative) Bibliography		4
Introduction		5
1 Scope		6
2 Normative references		6
3 Terms and definitions		7
4 Qualification test requirements		8
4.1 General		8
4.2 Welding processes		9
4.3 Welding positions		9
4.4 Product types/semi-finished products applicable to welder qualification tests		9
4.5 Material groups		10
4.6 Butt weld material thickness		11
4.7 Fillet weld material thickness		11
4.8 Special qualification tests		11
4.9 Designation for qualification test		12
5 Conditions required for welder and welding operator qualification tests		13
5.1 Physical requirements for welder and welding operator		13
5.2 Person responsible for welder and welding operator qualification tests		13
6 Performing the welder and welding operator qualification test		13
6.1 Practical qualification test		13
6.2 Theory test		14
7 Test pieces		14
8 Examination and testing		18
8.1 General		18
8.2 Visual and dimensional examination		19
8.3 Surface imperfection detection		19
8.4 Radiographic examination		19
8.5 Metallographic examinations		19
8.6 Bend test		19
8.7 Fracture surface examination		19
9 Acceptance criteria		19
10 Qualification test certificate and documentation		20
11 Period of validity of the qualification		20
12 Requalification test		21
Annex A (normative) Test piece acceptance criteria		22

Annex C (informative) Welder qualification test certificate	28
Annex D (informative) Welding operator qualification test certificate	29
Annex E (informative) Guidelines for the theory test	31
Annex F (informative) How to use Table 1	35
