ISO 27307:2015-06 (E)

Thermal spraying - Evaluation of adhesion/cohesion of thermal sprayed ceramic coatings by transverse scratch testing

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 1

5 Equipment and materials 2

6 Procedures of transverse scratch testing 2
6.1 General requirements for the testing specimen 2
6.2 Environmental conditions 2
6.3 Scratch testing on cross-section 2
6.4 Evaluation of failure mode 3

7 Scratch testing report 4

Annex A (informative) Typical coating failure modes after scratch testing 5

Annex B (normative) Transverse scratch testing record 6

Annex C (informative) Round robin test results of transverse scratch testing for plasma sprayed ceramic coatings 7
